Subject index

3′−5′ exonuclease
effect of site directed mutagenesis in Exo III motif of region of Φ29 DNA polymerase 4227
3β-hydroxy steroid dehydrogenase/$\Delta^5-\Delta^4$ isomerase
encoded by vaccinia virus SalF7L ORF 1973
Φ29
effect of site directed mutagenesis in Exo III motif of DNA polymerase 4227
ABA
and light regulate *Craterostigma plantagineum* desiccation tolerance gene 2771
Acetylcholine
agonist-evoked cytoplasmic Ca^{2+} signals, spatial and temporal distribution 1623
Acetylcholine receptor
α7 nicotinic, neuronal specificity of promoter develops during neurogenesis 4529
Acetylcholinesterase
relay of substrate inhibition in 3561
Torpedo, molecular architecture of collagen-tailed forms 3255
Acidic fibroblast growth factor
fusion protein with diphtheria toxin A fragment, tight folding prevents membrane translocation 4835
Acinar cells
exocrine, agonist-evoked cytoplasmic Ca^{2+} signals, spatial and temporal distribution 1623
Actin
analysis of actobindin and thymosin β4 motifs involved in actin binding 4739
interaction with myosin, myosin subdomains responsible for 4715
Physarum polycephalum, sites of phosphorylation 3185
Actin assembly
in host cells requires *Listeria monocytogenes* virulence gene *act*A 1981
Actin filaments
associated phosphoprotein 2063
Actin reorganization
and platelet-derived growth factor 543
Actobindin
analysis of motifs involved in actin binding 4739
Acute promyelocytic leukaemia
characterization of retinoic acid receptor α−Myl fusion proteins 629
heterogeneous PML/RARα transcripts in t(15;17) translocation 1397
Acyl carrier protein
copurifies with *Escherichia coli* MukB 5101
Acyl CoA oxidase
5′ sequence upstream of gene is recognized by mouse peroxisome proliferator activated receptor 433
Adeno-associated virus
preferred site for integration by non-homologous recombination 5071
A_2 adenosine receptor
constitutive expression in thyroid induces thyroid hyperplasia and hyperthyroidism 537
Adenovirus
DNA replication, initiation 761
DNA replication, role of nuclear factor I 751
E1a gene prevents repression of DRTF1 by retinoblastoma protein 2603
regions of E1A required for transactivation of E4 promoter 3347
Adenovirus E1A
regulation of c-*jun* transcription in embryonal carcinoma cells 167
Adenylate cyclase
coupling with *Drosophila* serotonin receptor 7
Adenylate deaminase 2
gene amplification is associated with chromosome instability 2665
Adherens junctions
effect of tyrosine phosphorylation 1733
ADP ribosylation
immunoglobulin heavy chain binding protein 63
ADP-glucose pyrophosphorylase
inhibition, effect on *Solanum tuberosum* tuber development 1229
Aerolysin
mechanism of formation of membrane channel 2457
Aeromonas hydrophila
mechanism of formation of aerolysin membrane channel 2457
African swine fever virus
encodes ubiquitin conjugating enzyme 361
Albino deletion *c^{14CoS}*
mouse, effect on albumin and α-fetoprotein transcription 127
Albumin
mouse, transcription regulation 127
transcription is regulated by NF-Y 3315
Alkaline phosphatase
Escherichia coli, folding, requires *ppfA* gene 57
Alkylation repair
effect of expression of *Escherichia coli* 3-methyladenine *tag* gene in mammalian cells on sensitivity to methylating agents 4439
Allostery
co-operative binding of *Saccharomyces cerevisiae* fructose-1,6-bisphosphate to pyruvate kinase 3811
Alternative splicing
c-*ets-1* 1095
cyclic AMP response element binding protein 1503
Drosophila proboscipedia 1437
fibroblast growth factor receptors, derivation by 1885
generates heterogeneous PML/RARα transcripts in acute promyelocytic leukaemia 1397
of *Drosophila tramtrack*, generates zinc finger proteins with distinct DNA binding specificities 1035
of fibroblast growth factor receptor 4273
of *GHF1* primary transcript, produces two distinct homeodomain proteins 2261
of mouse *Hox-2.7* homeobox gene 1825
Alu family
mobility of nucleosomes 2951
Alzheimer's disease
polyadenylation regulates translation of amyloid protein precursor 3099
reduced expression of growth inhibitory factor 4843
role of amyloid P protein 813
tau protein, switch to 'Alzheimer state', role of protein phosphorylation 1593
tau protein is transformed by MAP kinase into Alzheimer-like state 2131
Amino acid biosynthesis
Saccharomyces cerevisiae, sequence-specific initiator elements focus transcription initiation from the *TRP4* promoter 4583
Amino acid starvation
effect on expression of the seven *Escherichia coli* rRNA operons 4175
Aminoacyl-tRNA synthetases
mutations in, associated with resistance to mecillinam 1493
Aminoacylation
bases required for correct aminoacylation of *Escherichia coli* $tRNA^{Gln}$ 4159
Amphiphysin
a novel protein associated with synaptic vesicles 2521
Amplification
as a mechanism of antifolate resistance in *Leishmania* 3601
Bacillus subtilis, mechanisms 1317
of adenylate deaminase 2 gene, is associated with chromosome instability 2665
of sodium ion/proton antiporter, confers sodium and lithium tolerance on *Schizosaccharomyces pombe* 1631
Amyloid P protein
carbohydrate binding 813

Amyloid protein precursor
translation of, is regulated by polyadenylation 3099
Aneuploidy
mouse trisomy 16, dysregulation of gene expression 619
Angiotensinogen gene
overexpression of in transgenic mice 821
Anion exchanger
erythrocyte, linkage to protein 4.1, domains involved in 2863
Ankyrin-related repeats
in NF-κB p105 precursor are similar to those in IκB 3003
Antagonists
of interleukin-4, created by mutation 3237
of mouse interleukin 2, production of by mutation 3905
Antibiotic biosynthesis
puromycin, gene cluster 785
Antibody class switching
145
Antibody diversity
affinity maturation of antibodies in *Xenopus* 4337
Antibody production
by cyclostomes 829
Anticodon nuclease
determination of latency by Hsd restriction−modification proteins 3129
Antifolate resistance
in *Leishmania*, amplification as a mechanism of 3601
Antigen presentation
effect of truncation of cytoplasmic domain of invariant chain 2841
Antigen receptor genes
V(D)J recombination, accessibility, determinants 315
Antiproliferative genes
BTG1 1663
Antirrhinum
flower development, role of *deficiens* 251
role of *GLOBOSA* and *DEFICIENS* in flower development 4693
Antirrhinum majus
flower development, effect of *squamosa* mutation 1239
Antisense RNA
CopA, role in control of replication of R1 plasmid 1195
inhibits translation of RepA leader peptide 2675
Antitermination
controls expression of *Bacillus subtilis* threonyl tRNA synthetase genes 3117
Antiviral agents
role of MxA protein in resistance to influenza virus and vesicular stomatitis virus 1657
AP endonuclease
redox activation of Fos and Jun 3323
AP-1 motif
binding of Fos and Jun, stimulation 653
AP-2
activates HTLV-I gene expression 2573
Apoptosis
role of PD-1 gene 3887
Arabidopsis thaliana
homologues of *Saccharomyces cerevisiae* Sar1 and Sec12 proteins involved in formation of transport vesicles from ER 4205
hypersensitive response to *Pseudomonas syringae* infection, role of *EL13* and *RPM1* genes 4677
mitochondrial RNA processing RNA is associated with higher order structures in the nucleolus 3737
protein phosphatase 1, complements *Schizosaccharomyces pombe* cs *dis2*-11 mutant 1327
role of fatty acids in chilling sensitivity 4685
structural and sequence requirements of pseudouridine 35 biosynthesis in pre-tRNA^{Tyr} 1907
transcription factors, GBF1 1275
transcription factors, heterodimerization 1261
Archaebacteria
cytochromes 805
Thermoplasma acidophilum, subunit structure of proteasome 1607
Ascobolus immersus
epimutation of repeated genes in 4451
Aspartate carbamoyltransferase
Escherichia coli, similarity to *Dictyostelium discoideum* nucleoside diphosphate kinase 3203
Aspergillus nidulans
cell cycle, *nimE* and *nimT* are homologues of *Schizosaccharomyces pombe cdc13* and *cdc25* 2139
NIMA protein kinase is related to mouse Nek1 3521
ATP binding and hydrolysis
regions of translation initiation factor eIF-4A involved in 2643
ATPase
activity intrinsic to *Saccharomyces cerevisiae* PRP2 splicing factor 2319
ATPase activity
of NTRC transcriptional activator depends on phosphorylation 2219

B cell precursors
differentiation *in vitro* 593
B cell proliferation
role of CD40 and gp39 4313
B cells
activation of by tyrosine kinase via FcγRIII, role of associated γ chain 2747
pancreatic, Ca^{2+} transients in 2877
Pre-B cells
novel regulatory myosin light chain gene as a marker to distinguish adult bone marrow and fetal live 2759
surface IgM mediated regulation of *RAG* gene expression in Eμ−N-*myc* B cell lines 2727
B lymphoid progenitors
immunoglobulin gene rearrangements used as marker to analyse timing of formation of 4349
B-*myb*
chicken, inhibits v-*myb*-induced gene activation 4619
Bacillus subtilis
amplification, mechanisms 1317
signal peptidase I, sequence comparison with other prokaryotic and eukaryotic signal peptidases 2819
threonyl tRNA synthetase, control of gene expression by antitermination 3117
Bacterial invasion
rearrangements of cytoskeleton and of host cell proteins induced by enteropathogenic *Escherichia coli* 3551
Shigella flexneri IpaB causes entry into epithelial cells and escape from the phagocytic vacuole 1991
Bacteriophage lambda
mutational analysis of excisionase 3797
Bacteriophage Mu
virulence, effect of *Escherichia coli* Clp protease 5121
Bacteriophage P2−P4
capsid structure and assembly 839
Bacteriophage T4
determination of latency of T4-induced anticodon nuclease by Hsd restriction−modification proteins 3129
Band 3
transcription repressed by v-*erbA* 3355
Basement membrane
expression of laminin A chain during *Drosophila* embryogenesis 4519
Basic fibroblast growth factor
modifies *Xenopus* mesoderm induction by basic fibroblast growth factor 33
Beet necrotic yellow vein virus
role of RNA 3 in symptom expression 479
BHLH proteins
amino acids involved in specificity of binding to DNA 4103
Myf-5, domains required for muscle-specific transactivation 1843
SCL gene is a positive regulator of erythroid differentiation 4073
BiP
assembly and modification 63
interaction with Ig L chains during antibody assembly 1573
Schizosaccharomyces pombe, ER retention signal 1583
Bordetella pertussis
filamentous haemagglutinin, similarity to *Escherichia coli* PapC and PapD 3175
Brain
rat potassium channel is related to *Drosophila Shaw* gene 2473
Brain development
mouse *Emx1* and *Emx2* homeobox genes are related to *Drosophila empty spiracles* 2541

Brain-derived neurotrophic factor
interactions with neurotrophin-3 917
Brn-4
rat, a novel member of the POU domain family of transcription factors 2551
BTG1
expression during cell cycle; homology with PC3 1663
Butyrylcholinesterase
site-directed mutagenesis 1641

c-*ets*-1
gene product, DNA binding, inhibition 643
c-*fos*
mechanisms of superinduction by inhibitors of protein synthesis 2415
proto-oncogene, ternary complex formation over serum response element 3011
transcription, effect of phosphorylation of serum response factor 1045
c-*jun*
mechanisms of superinduction by inhibitors of protein synthesis 2415
transcription regulation by retinoic acid and adenovirus E1A in embryonal carcinoma cells 167
c-*myc*
efficiency of attenuator 1085
transcription of human c-*myc* in permeabilized nuclei is associated with formation of Z-DNA 4653
transcription termination is mediated by holdback of RNA polymerase II at transcriptional start site 3307
c-Rel
and NF-κB p65 subunit, heterodimerization 205
Ca^{2+} signals
cytoplasmic, spatial and temporal distribution in exocrine acinar cells 1623
Cadmium resistance
Schizosaccharomyces pombe hmt1 encodes a vacuolar membrane transporter 3491
Caenorhabditis elegans
fem-3 gene, post-transcriptional regulation 2303
mec-3 gene, regulation by homeodomain proteins 4969
mec-7 β-tubulin gene expression in touch receptor neurons 2885
molecular analysis of mutations in collagen *dpy-7* gene 3857
targeted alteration of genome 287
twitchin, similarity to titin 1711
Calcium
mechanosensitive ion channel in *Schizosaccharomyces pombe* 2869
Calcium channels
α1 subunit from smooth muscle, expression in CHO cells 2033
β-subunits, multiple forms 885
Ca^{2+} transients in pancreatic B cells 2877
Calcium influx
glutamate receptors, regulation by cAMP dependent protein kinase 891
cAMP-dependent protein kinase
association between RIIβ subunit and Golgi 1723
Capsid structure and assembly
bacteriophage P2–P4 839
Carbohydrate binding
by amyloid P protein 813
Carbonic anhydrase II
transcription repressed by v-*erbA* 3355
Casein kinase II
phosphorylates and activates mammalian DNA ligase I 2925
phosphorylates topoisomerase II *in vivo*, role of in cell cycle 1785
phosphorylation of UBF is required for transcription activation 2211
Casein kinase II sites
in serum response factor, phosphorylation, effect on DNA binding 97
CD2
effect of disrupted CD2 gene on development and function of mouse T cells 4329
CD23
cytokine effects of are mediated by an epitope distinct from the IgE binding site 4323
CD4
binding to HIV-1 gpl20 deletion mutants 585
diphtheria toxin fusion protein, effect on HIV infected cells 575
GPI-anchored form, endocytosis 863
CD40
role in B cell proliferation 4313
CD44
association with cytoskeleton, role of phosphorylation 4733
CD45 phosphotyrosine phosphatase
role in T cell receptor signal transduction 4887
cdc2
dephosphorylation of, role in exit from mitosis 2381
cdc2
human, transcriptional regulation of repression by retinoblastoma susceptibility gene product 1797
CDC25
Saccharomyces cerevisiae, homologous cDNAs in mouse 4007
CDC34 (UBC3)
Saccharomyces cerevisiae ubiquitin conjugating enzyme, role in cell cycle, deletion analysis 3081
CDK2
phosphorylation regulates activity during cell cycle 3995
Cell adhesion
analysis of binding sites for β_1 type integrin in type I collagen 3865
Drosophila, role of D*trk* 391
during *Xenopus* embryogenesis, glycolipid involved in 3845
effect of tyrosine phosphorylation on adherens junctions 1733
Cell adhesion molecule
CAM-like region of LAR removed by protein processing 897
Cell cycle
and changes in *Xenopus* p220 microtubule binding activity 3977
Aspergillus nidulans NIMA is related to mouse Nek1 protein kinase 3521
Aspergillus nidulans nimE and *nimT* are homologues of *Schizosaccharomyces pombe cdc13* and *cdc25* 2139
BTG1 expression during 1663
casein kinase II phosphorylates topoisomerase II *in vivo*, role of 1785
checkpoint controls, *Schizosaccharomyces pombe* 1343
checkpoint controls, *Schizosaccharomyces pombe rad-1* 1335
CSF and transforming activities of *Xenopus* Mos occur at different times in cell cycle 2447
dual role of *Saccharomyces cerevisiae CDC6* 2167
effect of truncation of CaMKII protein kinases 507
factors affecting stability of Mos during *Xenopus* meiotic oocyte maturation 2433
family of kinases related to $p34^{cdc2}$ kinase 2909
fluctuations of chloride conductance during G_1 875
HIV can infect cells in cell cycle arrest 3053
human, requirement for cyclin A 961
localization of rab4 during, is determined by phosphorylation 4379
mouse homologue of *Saccharomyces cerevisiae* CDC48 3533
negative regulation of *Schizosaccharomyces pombe* mitosis by *pup1* and *pyp2* PTPases 4943
new cdc gene required for S phase entry in *Schizosaccharomyces pombe* 4923
novel *CDC* gene involved in G_2 phase control in *Saccharomyces cerevisiae* 4017
phosphorylation regulates CDK2 activity 3995
regulation of Cln3–Cdc28 kinase complex by proteolysis and phosphorylation 1773
regulation of glucocorticoid receptor 3457
release of clam oocytes from cell cycle arrest 3963
role of cdc2 dephosphorylation in exit from mitosis 2381
role of *Saccharomyces cerevisiae* CDC34 (UBC3), deletion analysis 3081
role of *Schizosaccharomyces pombe* pyp^3 protein tyrosine phosphatase in dephosphorylation of $p34^{cdc2}$ 4933
S-phase specific release from block in ribonucleotide reductase R2 subunit transcription 4953
Saccharomyces cerevisiae, properties of chimeric CDC34–RAD6 protein 3091
timing of RPA-32 phosphorylation 2177, 2189
transcriptional regulation of human *cdc2* 1797

Cell determination
during *Drosophila* eye development, role of *giant lens* 2531
Cell division
abnormal division of sensory mother cells in *Drosophila melanogaster Cyclin-A* mutant 2935
Cell locomotion
and cycling of integrins 405
by endocytosis of transferrin receptor 383
Cell proliferation
role of BTG1 1663
Cervical cancer
activation of HPV-16 *E6* and *E7* transcription 2271
effect of RAR-β on expression of HPV18 *E6* and *E7* genes 2283
Cervical carcinoma
HPV^+, analysis of mutations in 3935
CFTR
regulation of expression of and differentiation of intestinal epithelium 2487
Chaperone
Escherichia coli PapD, similarity to *Bordetella pertussis* filamentous haemagglutinin 3175
periplasmic pilus, role of in assembly of pili 4747
Saccharomyces cerevisiae BiP, regulation of transcription 2583
Chaperonin
a eukaryotic equivalent of 4767
dnaK, *Escherichia coli*, role in protein degradation 71
role of interaction with GroES in GroEL-mediated protein folding 4757
Chemotaxis
effect of platelet-derived growth factor 543
Chestnut blight
hypovirulence, associated with viral double-stranded RNA 473
Chick
limb development, epithelial–mesenchymal interactions and *Hox-4* genes 1451
Chick embryo
paramyxovirus tropism, role of factor X expression 467
Chicken
B-*myb* inhibits v-*myb*-induced gene activation 4619
Chilling sensitivity
in *Arabidopsis thaliana*, role of phosphatidylglycerol 4685
Chlamydomonas reinhardtii
biosynthesis of holo cyt *c6* and cyt *b6f* 2789
chloroplast mutant defective in light-independent synthesis of chlorophyll 1697
Chloride conductance
cell cycle regulation of 875
Chlorohydra viridissima
HOM/HOX homeobox genes, expression during regeneration 1815
Chlorophyll
light-independent synthesis of, chloroplast gene required in *Chlamydomonas reinhardtii* 1697
Chloroplast
Chlamydomonas reinhardtii mutant defective in light-independent synthesis of chlorophyll 1697
Euglena gracilis, new type of twintron 5041
pea, proteins involved in proteolytic processing of precursors targeted to 4401
tobacco, translatable *psbL* mRNA 1099
Chloroquine
effect of deamplification of *pfmdr1* gene on chloroquine and mefloquine resistance 3067
Cholecystokinin
agonist-evoked cytoplasmic Ca^{2+} signals, spatial and temporal distribution 1623
Cholera toxin
B subunit, formation of translocation intermediates during protein translocation 2327
Cholinesterases
structure–function relationships 1641
Chondrocytes
prepro-enkephalin expression 135
Chromatin
inactive, role of histone H4 N-terminus 2201
Chromatin repression
Drosophila melanogaster Polycomb and polyhomeotic products form multimeric protein complex 2941
Chromatin structure
effect of *Drosophila melanogaster modulo* 4471
species specificity in *Saccharomyces cerevisiae* and *Schizosaccharomyces pombe* 1177
Chromosomal location
effect on expression of the seven *Escherichia coli* rRNA operons 4175
Chromosomal rearrangement
illegitimate recombination is associated with DNA bending in mammalian cells 5063
Chromosome 16
translocation involving IL2 gene in T cell lymphoma 3897
Chromosome breakage and healing
inactivates *Plasmodium falciparum Pf11-1* gene 2293
Chromosome instability
associated with shortening of telomeres, is arrested in immortal cells with telomerase activity 1921
Chromosome partitioning
Escherichia coli, role of MukB 5101
Chromosome structure
and DNA replication time zones 1217
Chromosomes
coiled-coil protein specific for synaptonemal complex of meiotic prophase chromosomes 5091
frequent transpositions of *Drosophila melanogaster* Het-A elements to receding chromosome ends, role of in healing broken chromosome ends 4459
human, telomeres are attached to nuclear matrix 717
instability of during early stages of adenylate deaminase 2 gene amplification 2665
rate of evolution of X chromosome α-repeat DNA 2367
Saccharomyces cerevisiae, double-strand breaks induced during meiosis 3441
cIBR
from erythroid cells, repression of histone H5 transcription initiation 1857
Circadian rhythms
Drosophila, effect of *disconnected* mutants 1
Circular DNA
role in V gene replacement 611
Clam oocytes
phosphorylation of $p42^{MAPK}$ after fertilization 3963
Clathrin
role of in sorting of vacuolar proteins in Golgi 2811
Coiled-coil proteins
Thermotoga maritima Ompα spans periplasmic space 4369
Colicin A
Escherichia coli, unfolds during translocation 441
Collagen
molecular analysis of mutations in *Caenorhabditis elegans dpy-7* gene 3857
molecular architecture of collagen-tailed forms of *Torpedo* acetylcholinesterase 3255
mutation, mouse, complementation by yeast artificial chromosomes 417
type I, analysis of binding sites for β_1 type integrin 3865
type IV α3 chain, structure and binding to heparin and hyaluronan 4281
Colony-stimulating factor 1
activating mutations 551
Colour vision
polymorphism of photopigments in marmoset, genetic basis 2039
Complement proteins
isolation from the hagfish *Eptatretus burgeri* 829
Concanavalin A
precursor, activation, role of glycosylation 1303
precursor, activation by deglycosylation 1297
Co-operativity
co-operative binding of *Saccharomyces cerevisiae* fructose-1,6-bisphosphate to pyruvate kinase 3811
Copper binding site
insertion into *Escherichia coli* cytochrome *c* oxidase complex with quinol oxidase 3209
Coprinus cinereus
sexual and asexual development, regulation by *A* mating type factor 1805

CPF1
amino acids involved in specificity of binding to DNA 4103
Craterostigma plantagineum
desiccation tolerance gene, is regulated by light and ABA 2771
CREB
effects of phosphorylation by protein kinase A 3337
Cruciform DNA
digestion by endonuclease, defect in *Saccharomyces cerevisiae* mutant 699
Cryphonectria parasitica
hypovirulence, associated with viral double-stranded RNA 473
hypovirulent, mechanism of suppression of laccase transcription in 4539
Cyclic AMP–CRP
regulation of *Escherichia coli cdd* promoter 3635
Cyclic AMP receptor protein
DNA deformation in nucleoprotein complexes between cyclic AMP receptor protein, RNA polymerase and *lac* UV_5 promoter 2619
Cyclic AMP response element binding protein
alternative splicing and gene expression in spermatocytes 1503
Cyclin A
requirement for during human cell cycle 961
Cyclin B
complex with $p34^{cdc2}$, relocation of at meiosis reinitiation 1763
Cyclins
abnormal division of sensory mother cells in *Drosophila melanogaster Cyclin-A* mutant 2935
Cln3–Cdc28 kinase complex, regulation of by proteolysis and phosphorylation 1773
Xenopus laevis, cyclin A- and cyclin B-dependent protein kinases have differing mechanisms of regulation in egg extracts 1751
Cystic fibrosis
and P-glycoprotein genes have complementary expression patterns 4291
cell cycle regulation of chloride conductance 875
regulation of CFTR expression and differentiation of intestinal epithelium 2487
Cytidine deaminase
regulation of *Escherichia coli cdd* promoter by cyclic AMP–CRP 3635
Cytochrome b_5
signal sequence responsible for targeting to endoplasmic reticulum 4197
Cytochrome c_1
import into mitochondria, ATP requirements of 4787
Cytochrome *c* haem lyase
import into mitochondria 449
Cytochrome *c* oxidase
Escherichia coli, complex with quinol oxidase, insertion of copper binding site into 3209
of *Glycine max*, evidence for RNA-mediated transfer of gene from mitochondrion to nucleus 3815
Cytochrome *c* reductase
complex with ubiquinol, loss of activity in *Saccharomyces cerevisiae BSC1* mutant 3821
in potato, contains mitochondrial processing peptidase 3219
Cytochrome P-450
GC box in promoter region of 3663
Cytochromes
Chlamydomonas reinhardtii, biosynthesis of holo cyt *c6* and cyt *b6f* 2789
of *Sulfolobus acidocaldarius* 805
Cytokine receptors
domains of β subunit of receptor required for signal transduction and phosphorylation 3541
interleukin-2 and erythropoietin receptors have distinct signal transduction mechanisms 4909
Cytokines
cytokine effects of CD23 are mediated by an epitope distinct from the IgE binding site 4323
IL-3 and IL-4 activate different signal transduction cascades 4899
Cytokinin synthase
in *Rhodococcus fascians* 795
Cytoskeleton
association with CD44, role of phosphorylation 4733
rearrangements of induced in host cells during invasion of enteropathogenic *Escherichia coli* 3551
Cytostatic factor
CSF and transforming activities of *Xenopus* Mos occur at different times in cell cycle 2447
Cytotoxicity
heat shock protein hsp70 protects tumour cells from cytotoxicity of tumour necrosis factor 3507

Deamplification
of *Plasmodium falciparum pfmdr1* gene, effect on chloroquine and mefloquine resistance 3067
Deglycosylation
activates concanavalin A precursor 1297
Deletion
effect of transcription and repressor binding on deletion formation in *Escherichia coli* plasmids 3629
Dephosphorylation
of cdc2, role in exit from mitosis 2381
Desiccation tolerance
Craterostigma plantagineum gene is regulated by light and ABA 2771
Dictyostelium discoideum
role of DIF-1 in pattern formation 2849
X-ray structure of nucleoside diphosphate kinase 3203
Differentiation
Leishmania major lipophosphoglycan is modified during differentiation 3593
Differentiation *in vitro*
B cell precursors 593
Digital imaging microscopy
used to determine subnuclear localization of PRP6p splicing protein in *Saccharomyces cerevisiae* 3731
Dihydrolipoamide dehydrogenase
sequences directing E3 binding are located on E1 component of 2-oxoglutarate dehydrogenase complex 3229
Diphtheria toxin
A fragment, fusion protein with acidic fibroblast growth factor, membrane translocation of 4835
CD4 fusion protein, effect on HIV infected cells 575
Diptericin
Drosophila, gene regulation 1469
Disease resistance
role of *EL13* and *RPM1* genes in *Arabidopsis thaliana*
hypersensitive response to *Pseudomonas syringae* infection 4677
Distamycin
inhibits *Antennapedia* DNA–protein interaction 279
Disulfide bond
formation of in endoplasmic reticulum 1717
Disulfide bond formation
role in alkaline phosphatase folding 57
DJH structures
characterization of in mouse fetal liver 1891
DNA
deformation in nucleoprotein complexes between cyclic AMP receptor protein, RNA polymerase and *lac* UV_5 promoter 2619
B-DNA
double helix conformation, groove dimensions and ligand binding potential of G/C stretches 1931
rDNA
Saccharomyces cerevisiae, role of enhancer in stimulating transcription 4665
5S rDNA
mobility of nucleosomes 2951
Z-DNA
putative Z-DNA binding protein in *Saccharomyces cerevisiae* 3787
transcription of human c-*myc* in permeabilized nuclei is associated with formation of Z-DNA 4653
rDNA binding protein
Saccharomyces cerevisiae RBP1/REB1, function of 4665
DNA bending
human SRY HMG box recognizes four-way DNA junctions irrespective of sequence 4497
is associated with illegitimate recombination in mammalian cells 5063
DNA binding
by POU domain, specificity of 4993
c-*ets*-1 gene product, inhibition 643

determination of base recognition positions of zinc fingers from sequence analysis 4507
serum response factor, effect of phosphorylation at casein kinase II sites 97
DNA binding proteins
amino acids involved in specificity of binding of bHLH proteins to DNA 4103
Antirrhinum DEF A 251
co-operation of proto-NLSs in ER and PR 3681
Drosophila melanogaster modulo, patterns of gene expression during embryogenesis 4471
E.coli IHF, DNA sequence recognition, suppressor mutants 305
effects of phosphorylation of CREB 3337
Escherichia coli MukB, role of in chromosome partitioning 5101
Mnt repressor, interaction with DNA 215
mouse Sox-5, expression of during spermatogenesis 3705
mutational analysis of bacteriophage lambda excisionase 3797
Petunia, tissue-specific 241
putative Z-DNA binding protein in *Saccharomyces cerevisiae* 3787
rice GT-2 binds to *phyA* promoter 4131
role of POU domain in determining DNA binding specificity of LFB1/HNF1 4119
SAF-A, a novel scaffold attachment factor in HeLa cells 3431
single-stranded, homologue of *Escherichia coli* SSB in *Saccharomyces cerevisiae* 3421
sequence-specific interaction of TCF-1 and SRY occurs within minor groove 3039
DNA conformation
effect of O^6-ethyl-G-C 225
transcription of human c-*myc* in permeabilized nuclei is associated with formation of Z-DNA 4653
DNA damage
mode of initiation of *Escherichia coli* DNA replication alters after induction of SOS response 4219
DNA duplication
Tn*3* transposase may be involved in production of 'staggered' head-to-head dimers of *Escherichia coli* plasmid DNA 1965
DNA junctions
human SRY HMG box recognizes four-way DNA junctions irrespective of sequence 4497
DNA lesions
O^6-ethyl-G-C, effect on DNA conformation 225
DNA ligase I
mammalian, is activated by phosphorylation by casein kinase II 2925
DNA looping
activation of replication origin 1205
DNA methylation
effect on accessibility to V(D)J recombination 315
role in transcription repression 327
DNA methyltransferase
mammalian, activation of by cleavage of a Zn binding regulatory domain 2611
DNA methyltransferases
modular nature of target recognizing domains 4445
DNA polymerase
Φ29, effect of site directed mutagenesis in Exo III motif 4227
adenovirus, heterodimer with preterminal protein, role in DNA replication initiation 761
evidence that DNA and RNA polymerases have similar active sites 3767
Saccharomyces cerevisiae MIP1 mutants with deficient proofreading exonucleolytic activity 2717
DNA polymerase α
SV40 T antigen and replication protein A, protein−protein interaction, role in DNA replication 769
DNA polymerase II
Saccharomyces cerevisiae, role in chromosomal DNA replication 733
DNA recombination
illegitimate, hotspots in interstitial telomeres 725
DNA replication
adenovirus, initiation 761
adenovirus, role of nuclear factor I 751
and RPA-32 phosphorylation 2177, 2189
and transactivation functions of BPV-1 E2 are separate 4111
chromosomal, *Saccharomyces cerevisiae*, role of DNA polymerase II 733
delineation of time zones by fluorescence *in situ* hybridization 1217
effect on accessibility to V(D)J recombination 315
in *Escherichia coli*, mode of initiation of alters after induction of SOS response 4219
isolation and analysis of gene encoding *Schizosaccharomyces pombe* polymerase δ accessory protein 5111
mapping of the *in vivo* start site for leading strand synthesis in plasmid R1 4481
polyoma virus and SV40, role in transcription regulation 177
R1 plasmid, control of replication, role of antisense RNA 1195
R6K plasmid, by DNA looping 1205
role of protein−protein interaction 769
DNA sequence recognition
by type IC restriction enzymes, variation in sequence specificity 233
differential, by *Drosophila* Ubx and Dfd homeodomains 4059
E.coli IHF, suppressor mutants 305
modular nature of target recognizing domains in DNA methyltransferases 4445
DNA structure
parallel-stranded DNA, potential intervention of a stable double-helical structure in recombination 3777
DnaA protein
is not required for determination of initiation site in plasmid R1 DNA replication 4481
Domoate
high affinity receptor 1651
DOPAchrome tautomerase
encoded by mouse *TRP-2* 519, 527
dorsal
Drosophila, mediates promoter activation and repression 1837
Double helix
conformation, groove dimensions and ligand binding potential of G/C stretches in B-DNA 1931
Double-strand breaks
in *Saccharomyces cerevisiae* chromosomes induced during meiosis 3441
Double-stranded RNA
binding to human p68 kinase 1553
viral, associated with chestnut blight hypovirulence 473
Down syndrome
mouse model, dysregulation of gene expression 619
Drosophila
alterations in *Ultrabithorax* promoter enhance transvection 3645
Antp-type homeodomain, DNA binding specificities correlate with regulatory functions 991
cell adhesion molecule 391
differential DNA sequence recognition by Ubx and Dfd homeodomains 4059
diptericin gene regulation 1469
disconnected mutants, effect on circadian rhythms 1
dorsal mediates promoter activation and repression 1837
effect of exchanging *dorsal* binding sites in *zerknüllt* and *twist* promoters 3147
empty spiracles, is a homeobox gene involved in head development 2247
empty spiracles, is related to mouse *Emx1* and *Emx2* homeobox genes 2541
even-skipped stripe 2, regulation of 4047
expression of laminin A chain during embryogenesis 4519
killer of prune mutation, structural basis of 3203
metamorphosis, temporal co-ordination of gene expression by ecdysone 4083
proboscipedia, gene structure 1437
regulation of *Scabrous* by Ultrabithorax proteins 3375
role of *extramacrochaetae* gene in sensory organ determination 3385
role of *giant lens* in cell determination during eye development 2531
serotonin receptor, expression 7
sharp anterior boundary of homeotic gene expression conferred by *fushi tarazu* protein 3653
Shaw gene is related to rat brain potassium channel 2473
tramtrack, alternative splicing 1035
ubiquitin conjugating enzyme, structural and functional conservation 367

Drosophila melanogaster
abnormal division of sensory mother cells in *Cyclin-A* mutant 2935
frequent transpositions of Het-A elements to receding chromosome ends, role of in healing broken chromosome ends 4459
patterns of *modulo* gene expression during embryogenesis 4471
Polycomb and polyhomeotic products form multimeric protein complex 2941
DRTF1
repression by retinoblastoma protein, is prevented by adenovirus E1a gene 2603

Ecdysone
temporal co-ordination of gene expression in *Drosophila* metamorphosis 4083

Electron transfer
light-driven cyclic, requires *pufX* in *Rhodobacter sphaeroides* 2779
EMBO Medal review
4251
Embryogenesis
Drosophila, expression of laminin A chain during 4519
Drosophila melanogaster, patterns of *modulo* gene expression during 4471
regulation of *Drosophila even-skipped* stripe 2 4047
Xenopus, glycolipid involved in cell adhesion 3845
Embryonal carcinoma cells
c-*jun* transcription regulation by retinoic acid and adenovirus E1A 167
empty spiracles
Drosophila, is related to mouse *Emx1* and *Emx2* homeobox genes 2541
Endocytosis
characterization of internalization signal for lysosomal acid phosphatase 4391
determinants of cycling of integrins 405
of GPI-anchored form of CD4 863
of transferrin receptor, can drive cell locomotion 383
Endonuclease
digestion of cruciform DNA, defect in *Saccharomyces cerevisiae* mutant 699
sequence-specific Endo.*Sce*I initiates recombination at its cutting site in *Saccharomyces cerevisiae* mitochondria 2707
Endopeptidase 24.11
regulation of production of interleukin 2 by T cells 3875
Endoplasmic reticulum
ER retention signal in *Schizosaccharomyces pombe* BiP 1583
manipulation of disulfide bond formation and protein folding 1717
retention of prolyl 4-hydroxylase in, effect of site directed mutagenesis of protein disulfide isomerase 4213
role of *Saccharomyces cerevisiae* Bos1p in ER to Golgi transport 3609
Saccharomyces cerevisiae Sar1 and Sec12 proteins involved in formation of transport vesicles from, *Arabidopsis thaliana* and *Schizosaccharomyces pombe* homologues of 4205
signal sequence responsible for targeting of cytochrome b_5 to 4197
signals for protein retention in 2345
Enhancer
erythroid-specific, role in regulation of β-globin subtype switching 2961
Enhancers
transcription factor activation domains involved in proximal and remote activation 4961
Enkephalins
expression in chondrocytes 135
5-enolpyruvylshikimate-3-phosphate synthase
Petunia, transcription regulation 241
Entamoeba histolytica
primary and secondary structure of pore-forming peptide 3501
Epidermal growth factor receptor
dephosphorylation, prevented by *src* homology domain 2 559
single amino acid substitution modifies mitogenic properties to resemble those of gp185$^{erbB\text{-}2}$ 3927
Epithelial–mesenchymal interactions
and *Hox-4* genes in chick limb development 1451
Epithelium
intestinal, differentiation of and regulation of CFTR expression 2487

Epstein–Barr virus
association with nuclear matrix, identification of MARs 1165
***erb*B-2**
single amino acid substitution in epidermal growth factor receptor modifies mitogenic properties to 3927
ERK2
activated by p21^{ras} 569
Erythrocyte
anion exchanger, domains involved in linkage to protein 4.1 2863
Erythroid differentiation
regulation by *SCL* gene 4073
Erythroleukaemia
v-*erbA* represses transcription of band 3 and carbonic anhydrase II 3355
Erythropoiesis
role of GATA-1 4557
role of GATA-1 in *cis*-regulation of glycophorin B transcription 4095
Erythropoietin
interleukin-2 and erythropoietin receptors have distinct signal transduction mechanisms 4909
Escherichia coli
alkaline phosphatase, folding requires *ppfA* gene 57
aspartate carbamoyltransferase, similarity to *Dictyostelium discoideum* nucleoside diphosphate kinase 3203
autoregulated expression of polynucleotide phosphorylase by an RNase III dependent mechanism 2633
bases required for correct aminoacylation of tRNA^{Gln} 4159
chaperonin dnaK, role in protein degradation 71
Clp protease, effect on bacteriophage Mu virulence 5121
colicin A, unfolds during translocation 441
effect of transcription and repressor binding on deletion formation in plasmids 3629
enteropathogenic, rearrangements of cytoskeleton and phosphorylation of host cell proteins induced by 3551
expression of 3-methyladenine *tag* gene in mammalian cells, effect on sensitivity to methylating agents 4439
expression of the seven rRNA operons 4175
fimbriae, repression of CFA/I operon by H-NS (H1) histone-like protein is overcome by CfaD 2627
fis promoter, is subject to stringent control 1075
histone-like proteins, HU modulates the binding of IHF to *oriC* 4489
homologue of SSB single-stranded DNA binding protein in *Saccharomyces cerevisiae* 3421
Hsd restriction–modification proteins determination of latency of T4-induced anticodon nuclease 3129
hypersymmetry in a rho-independent transcriptional terminator confers increased efficiency and bidirectionality 1957
insertion of copper binding site into quinol oxidase complex with cytochrome *c* oxidase 3209
integration host factor, DNA sequence recognition, suppressor mutants 305
lac operator–repressor, control of tobacco gene expression 1251
mode of initiation of DNA replication alters after induction of SOS response 4219
PapC and PapD, similarity to *Bordetella pertussis* filamentous haemagglutinin 3175
plasmid DNA, production of 'staggered' head-to-head dimers may involve Tn*3* transposase 1965
preprotein export 847
protein secretion, genetic analysis of 3165
recombination, unusual stability of intermediates made by RecA 2685
regulation of *cdd* promoter by cyclic AMP–CRP 3635
ribosome structure 373
role of MukB in chromosome partitioning 5101
translational control, analysis of the mRNA determinants required for the incorporation of selenocysteine 3759
Euglena gracilis
new type of twintron in chloroplast 5041
Eukaryotic initiation factor 2
binding to human p68 kinase 1553
Evolution
evidence for RNA-mediated transfer of *Glycine max* cytochrome *c* oxidase gene from mitochondrion to nucleus 3815
of human X chromosome α-repeat DNA 2367

of nuclear receptor genes 1003
of primate lentiviruses 3405
Excisionase
bacteriophage lambda, mutational analysis of 3797
Extracellular matrix
binding of collagen type IV $\alpha 3$ chain 4281
Volvox carteri, biogenesis of 2055
Eye development
in *Drosophila*, role of *giant lens* in cell determination 2531

Factor X
expression, role in paramyxovirus tropism 467
Fasciation induction
role of *Rhodococcus fascians*, depends upon cytokinin synthase 795
Fatty acid synthase
Saccharomyces cerevisiae FAS genes, regulation 107
Fatty acids
role of phosphatidylglycerol in *Arabidopsis thaliana* chilling sensitivity 4685
Fc receptors
myeloid, activation medidated by 4861
Ferredoxin
regulation of *Fed-1* gene transcription by light 2311
Fertilization
of clam oocytes: subsequent phosphorylation of $p42^{MAPK}$ 3963
α-fetoprotein
mouse, transcription regulation 127
Fibroblast growth factor
receptor-4, characterization of genomic structure, ligand binding and signal transduction 4273
receptors, examination of receptor–ligand specificity, derivation by alternative splicing 1885
Fimbriae
Escherichia coli, repression of CFA/I operon by H-NS (H1) histone-like protein is overcome by CfaD 2627
Fis
effect on expression of the seven *Escherichia coli* rRNA operons 4175
Flower development
Antirrhinum, role of *deficiens* 251
Antirrhinum, role of *GLOBOSA* and *DEFICIENS* 4693
Antirrhinum majus, effect of *squamosa* mutation 1239
fms
activating mutations 551
Focal contacts
associated phosphoprotein 2063
Foot-and-mouth disease virus
translation, usage of dual initiation sites 1105
Fos
and Jun, binding to AP-1 motif, stimulation 653
redox activation by AP endonuclease 3323
Fructose-1,6-bisphosphate
Saccharomyces cerevisiae, co-operative binding to pyruvate kinase 3811
Furin
activates influenza virus haemagglutinin with multibasic cleavage site 2407

G-proteins
in trans-Golgi network, role in vesicular transport 4795
mutagenesis analysis of *Saccharomyces cerevisiae STE4* gene product 4805
Saccharomyces cerevisiae STE20 gene product is required for $G_{\beta\gamma}$-mediated signal transduction 4815
G protein-coupled receptors
domains involved in subtype specificity of tachykinin receptors 3585
Drosophila serotonin receptor, expression of 7
G/C stretches
in B-DNA, groove dimensions and ligand binding potential 1931
$GABA_A$ receptor
ligand-gated ion channel, effect of mutations on pharmacological properties 2017
GAL–VP16
transcriptional activator, mechanism of action 2229
Gametogenesis
Plasmodium falciparum Pf11-1 gene product is gametocyte-specific 2293
GAP-43
activation of G_o GTP binding protein, is blocked by palmitoylation 2095
GATA-1
effect on *SCL* gene 4073
role in *cis*-regulation of glycophorin B transcription 4095
GC box
in promoter region of cytochrome P-450 3663
GCN4
Saccharomyces cerevisiae, transcription requires GCN5 protein 4145
GCN5 protein
required for transcription of *Saccharomyces cerevisiae* GCN4 and HAP2–HAP3–HAP4 4145
GDP dissociation factor
residues involved in conversion of RAS from GDP- to GTP-bound form 2855
Gene expression
maize *Adh1*, role of TATA box 157
of HTLV-I is activated by AP-2 transcription factor 2573
tobacco, control by *Escherichia coli lac* operator–repressor 1251
Gene silencing
Ascobolus immersus, role of cytosine methylation 4451
Genome evolution
Salmonella typhimurium 1309
***GHF1* primary transcript**
alternative splicing produces two distinct homeodomain proteins 2261
Glial fibrillary acidic protein
timing of phosphorylation during mitosis 2895
α globin
analysis of human α globin upstream regulatory element in transgenic mice 4565
β-globin
mRNA containing nonsense codon is degraded 3271
subtype switching, regulation of 2961
β-1,3-glucanase
transgene, suppression of expression in homozygous plants 2595
Glucocorticoids
interference with phorbol ester-induced AP-1 activity 2241
Glucocorticoid receptor
regulation of during cell cycle 3457
transcription activation by 1025
Glucose regulated protein
GRP78, role in secretion and stress response 1563
Glutamate receptor
GluR-5, pharmacological properties 1651
Glycine max
evidence for RNA-mediated transfer of cytochrome *c* oxidase gene from mitochondrion to nucleus 3815
Glycine receptor
adult and neonatal forms, differing pharmacological properties 2025
M2 segment of β subunit confers picrotoxinin resistance to inhibitory glycine receptor channels 4305
Glycogen metabolism
Saccharomyces cerevisiae, regulation 87
Glycolipid
involved in cell adhesion during *Xenopus* embryogenesis 3845
Glycophorin B
role of GATA-1 in *cis*-regulation of transcription 4095
Glycophosphatidylinositol anchors
CD4, endocytosis 863
Saccharomyces cerevisiae, variation in lipid component 457
Glycoprotein
transmembrane, encoded by mouse mammary tumour virus long terminal repeat 1901
Glycoproteins
concanavalin A precursor, activation by deglycosylation 1297
Saccharomyces cerevisiae OCH1 encodes a novel membrane bound mannosyltransferase 2511
Glycosylation
role in concanavalin A precursor activation 1303
Saccharomyces cerevisiae, oligosaccharyl transferase activity requires *WBP1* 2071
Golgi
identification of RIIβ subunit binding protein of the cAMP-dependent protein kinase 1723
sorting of vacuolar proteins, role of clathrin 2811

Golgi apparatus
membrane flow into and out of, role of *ERD2* in *Saccharomyces cerevisiae* 4187
gp39
role in B cell proliferation 4313
Gram-negative bacteria
Iga-mediated protein translocation, formation of translocation intermediates 2327
Granulocyte macrophage colony-stimulating factor
domains of β subunit of receptor required for signal transduction and phosphorylation 3541
structure–function 909
GroEL
role of interaction with GroES in GroEL-mediated protein folding 4757
Growth factors
GMSF, structure–function 909
structure–function analysis of interaction of hepatocyte growth factor with its receptor 2503
v-*abl* tyrosine kinase can inhibit or stimulate cell growth 3941
Growth factor receptors
activating mutations, identification 551
fibroblast growth factor receptors, examination of receptor–ligand specificity, derivation by alternative splicing 1885
Growth inhibitory factor
reduced expression of in Alzheimer's disease 4843
GTP binding protein
G_o, activation by GAP-43 is blocked by palmitoylation 2095
GTP/GDP binding site
within the T-cell receptor ζ chain 933
Guanine nucleotide dissociation stimulator
regions of Ha-*ras* p21 required for action of SDC25 C-domain 2391
Guard cell
voltage-dependent anion channel in plasma membrane 3569

H^+-ATPase
16 kDa membrane pore forming protein forms complex with PDGF receptor and BPV-1 E5 protein 4851
H-2K^b
regulatory region required for transcription 4591
Ha-*ras*
regions of p21 required for action of SDC25 C-domain 2391
Haem
attachment to *Chlamydomonas reinhardtii* cytochromes holo cyt *c6* and cyt *b6f* 2789
Haemagglutinin
of influenza virus, haemagglutinin with multibasic cleavage site is activated by furin 2407
Haematopoiesis
role of GATA-1 4557
role of human HOX2.2 homeotic gene 983
Haemin
mechanism of uptake in *Yersinia enterocolitica* 4359
Hagfish
complement proteins 829
Hairpin binding factors
and U7 snRNP, interaction with histone pre-mRNA 691
Hammerhead ribozymes
artificial nuclease resistant, synthesis of 1913
HAP2–HAP3–HAP4
Saccharomyces cerevisiae, transcription requires GCN5 protein 4145
Head development
Drosophila, role of *empty spiracles* homeobox gene 2247
Heat shock proteins
Escherichia coli, role in protein degradation 71
hsp70, complexes with p53 and is involved in regulation of p53 conformation 3513
hsp70, protects tumour cells from tumour necrosis factor cytotoxicity 3507
role of Hsp104 heat shock proteins in tolerance of stress 2357
Heavy metal tolerance
Schizosaccharomyces pombe, *hmt1* encodes a vacuolar membrane transporter 3491
Heavy metals
tolerance of, role of Hsp104 2357

Helix–loop–helix proteins
heir-1 HLH gene expression and N-*myc* gene expression are mutually exclusive 2563
Saccharomyces cerevisiae fatty acid synthase 107
Xenopus E12 role in muscle gene activation 2981
Helix–turn–helix motif
of Lac repressor, effect of replacing with lambda cro HTH motif 3031
Hepatitis B virus
initiation of nucleocapsid assembly 3413
MHBs^t transactivator, activation of NF-κB 2991
Hepatocarcinogenesis
mouse 433
Hepatocyte growth factor
activation requires extracellular proteolytic cleavage by urokinase 4825
interaction with its receptor, structure–function analysis of 2503
Heterodimerization
NF-κB p65 subunit and C-Rel 205
steroid hormone receptors 1409, 1419
High mobility group proteins
HMG boxes and DNA binding 1055
Hin recombinase
Salmonella, sequence-specific interaction with DNA 2695
Histones
H3 mutations allow hyperactivation of *Saccharomyces cerevisiae GAL1* 3297
H4 N-terminus, role in repression of *Saccharomyces cerevisiae* silent mating loci 2201
Histone genes
pre-mRNA, interaction with U7 snRNP and hairpin binding factors 691
Histone H1
similarity to putative Z-DNA binding protein in *Saccharomyces cerevisiae* 3787
Histone H4
similarity to osteogenic growth peptide 1867
Histone H5
repression of transcription initiation by cIBR from erythroid cells 1857
Histone-like protein
Escherichia coli H-NS (H1), repression of CFA/I operon is overcome by CfaD 2627
Histone-like proteins
Escherichia coli HU modulates the binding of IHF to *oriC* 4489
HIV
can infect cells in cell cycle arrest 3053
effect of diphtheria toxin–CD4 fusion protein on infected cells 575
polyadenylation 1513
HIV-1
gp120, deletion mutants, binding to CD4 585
proteinase, specificity and activity 1141
reverse transcriptase 1131
RNA binding properties of Rev basic peptide 1119
pre-mRNA processing, 3′ processing *in vitro* requires upstream element and TAR 4419
structure of NCp7 nucleocapsid protein 3059
TAR-independent activation of transcription by Tat 3395
HIV-2
and other primate lentiviruses, evolution of 3405
HLA-DR
complex with truncated invariant chain, effect on antigen presentation 2841
HMG box
HMG-box1 required for nucleolar targeting of murine UBF 3695
human SRY HMG box recognizes four-way DNA junctions irrespective of sequence 4497
HMG box proteins
mouse Sox-5, expression of during spermatogenesis 3705
TCF-1 and SRY, sequence-specific interaction with DNA occurs within minor groove 3039
Hodgkin's disease
overexpression of intermediate filament associated protein in Reed–Sternberg cells 2103
Holliday junctions
unusual stability of intermediates made by *Escherichia coli* RecA 2685

Homeodomain proteins
regulate *Caenorhabditis elegans mec-3* gene 4969
two distinct forms produced by alternative splicing of *GHF1* primary transcript 2261
Homeodomains
Antennapedia, DNA binding, inhibition by distamycin 279
Antp-type, DNA binding specificities correlate with regulatory functions 991
DNA binding specificity of POU domain 4993
Drosophila Ubx and Dfd, differential DNA sequence recognition by 4059
labial and *Deformed* of *Chlorohydra viridissima* 1815
Homeoproteins
regulation of human *HOX3D* homeobox gene 265
Homeotic genes
Antirrhinum deficiens 251
Antirrhinum majus squamosa, effect of mutation 1239
Drosophila empty spiracles, role in head development 2247
Drosophila melanogaster Polycomb and polyhomeotic products form multimeric protein complex 2941
Drosophila proboscipedia 1437
GLOBOSA and *DEFICIENS*, role in *Antirrhinum* flower development 4693
HOM/HOX, expression during regeneration of *Chlorohydra viridissima* 1815
human HOX2.2, expression of in haematopoiesis 983
human *HOX3D*, regulation by retinoic acid 265
mouse *Emx1* and *Emx2* are related to *Drosophila empty spiracles* 2541
mouse *Hox-2.7*, alternative splicing of 1825
regulation of *Drosophila Scabrous* by Ultrabithorax proteins 3375
sharp anterior boundary of expression conferred by *fushi tarazu* protein 3653
transcription activation by mouse *Hox-4.2* 3673
Zea mays Zmhox1a 3367
Hoogsteen base pairing
parallel-stranded DNA, potential intervention of a stable double-helical structure in recombination 3777
Horizontal gene transfer
related penicillin binding protein 1a genes in different penicillin resistant isolates of *Streptococcus pneumoniae* 3831
Salmonella typhimurium phoN 1309
Hormone biosynthesis
evidence for presence of a secondary structure at processing site of pro-ocytocin 2399
***Hox-4* genes**
mouse and human, regulation 1459
HPV-16
keratinocyte-specific activation of *E6* and *E7* transcription 2271
HPV18
expression of *E6* and *E7* genes, effect of retinoic acid receptor RAR-β 2283
Hsd restriction–modification proteins
determination of latency of anticodon nuclease 3129
hsp70
complexes with p53 and is involved in regulation of p53 conformation 3513
protects tumour cells from cytotoxicity of tumour necrosis factor 3507
5-HT receptor
rat stomach fundus, cloning and functional characterization 3481
HTLV-I
gene expression is activated by AP-2 transcription factor 2573
Human
and mouse *Hox-4* genes 1459
evolution of X chromosome α-repeat DNA 2367
p68 kinase, inhibits growth of *Saccharomyces cerevisiae* 1553
papillomavirus, targeted degradation of retinoblastoma protein by E7–E6 fusion proteins 2425
Hypersymmetry
in a rho-independent transcriptional terminator confers increased efficiency and bidirectionality 1957
Hypertension
development of in transgenic mice 821
Hyperthyroidism
induced by constitutive expression of A_2 adenosine receptor in thyroid 537
Hyphal elongation
Neurospora crassa, requires *cot-1*, which encodes a protein kinase 2159
Hypovirulence
chestnut blight, associated with viral double-stranded RNA 473
mechanism of suppression of laccase transcription in hypovirulent *Cryphonectria parasitica* 4539

IκB
ankyrin-related repeats similar to those in NF-κB p105 precursor 3003
Illegitimate recombination
is associated with DNA bending in mammalian cells 5063
Immortal cells
with telomerase activity, shortening of telomeres is arrested 1921
Immunoglobulin gene rearrangements
used as marker to analyse timing of formation of B lymphoid progenitors 4349
Immunoglobulin genes
heavy chain, D–J and V–DJ joining 4869
role of PD-1 gene in programmed cell death 3887
Immunoglobulin heavy chain binding protein
assembly and modification 63
Immunoglobulins
cytokine effects of CD23 are mediated by an epitope distinct from the IgE binding site 4323
gene rearrangement, characterization of DJH structures in mouse fetal liver 1891
germline γ1 RNA, transcription regulation 145
Ig L chains, interaction with BiP during antibody assembly 1573
role of associated γ chain in activation of B cells via FcγRIII 2747
surface IgM mediated regulation of *RAG* gene expression in Eμ–N-*myc* B cell lines 2727
V gene replacement, via circular DNA 611
V_H clans and families 603
Influenza virus
haemagglutinin with multibasic cleavage site is activated by furin 2407
resistance to, role of MxA protein 1657
strain B, neuraminidase, X-ray crystallography 49
Initiation factor eIF-4F
role in translation of mRNA containing extensive secondary structure 4153
Insect immunity
Drosophila diptericin, gene regulation 1469
Insertion sequence
IS*911*, model for transposition of 5079
Insulin
signal transduction, activation of phosphatidylinositol 3′ kinase 3469
Insulin secretion
Ca^{2+} transients in pancreatic B cells 2877
Integration host factor
Escherichia coli HU modulates the binding of IHF to *oriC* 4489
Integrins
β_1 type, analysis of binding sites for in type I collagen 3865
cycling by endocytosis, determinants 405
Interferon-β
murine, three-dimensional crystal structure 3193
transcription regulation, role of interferon regulatory factor 1 185
Interferon-γ
induces cDNA homologous to mammalian peptide chain release factor 489
induction of major histocompatibility complex class II promoter, mutational analysis 1351
Interferon regulatory factor 1
role in transcription regulation 185
Interleukin
IL-3 and IL-4 activate different signal transduction cascades 4899
Interleukin 2
interleukin-2 and erythropoietin receptors have distinct signal transduction mechanisms 4909
mouse, production of antagonists by mutation 3905
$p21^{ras}$ mediates control of *IL-2* gene promoter function in T cell activation 4549
production of by T cells, regulation of by endopeptidase 24.11 3875
translocation involving IL2 gene in T cell lymphoma 3897

Interleukin 3
domains of β subunit of receptor required for signal transduction and phosphorylation 3541
two distinct functional high affinity mouse interleukin-3 receptors 1875
Interleukin 4
antagonist created by mutation 3237
Interleukin 5
domains of β subunit of receptor required for signal transduction and phosphorylation 3541
Interleukin 7
novel regulatory myosin light chain gene is IL-7 inducible 2759
Interleukin-2 receptor
β chain, identification of IL-2 binding site 2047
Intermediate filament associated protein
overexpression of in Reed–Sternberg cells in Hodgkin's disease 2103
Internalization signal
for endocytosis of lysosomal acid phosphatase, characterization of 4391
Intracellular transport
of MHC class II molecules, inhibited by leupeptin 411
Introns
chloroplast group III introns, new type of twintron 5041
in *Paramecium* β-tubulin genes, analysis of 3713
Invariant chain
effect of truncation of cytoplasmic domain on antigen presentation 2841
Ion channels
communication between cells 1673
different types of *Xenopus* potassium channel are generated by different levels of a single mRNA 2465
$GABA_A$ receptor, effect of mutations on pharmacological properties 2017
GluR-5 glutamate receptor, pharmacological properties 1651
glycine receptor, adult and neonatal forms, differing pharmacological properties 2025
mechanosensitive ion channel in *Schizosaccharomyces pombe* 2869
single, recording currents to analyse neuromuscular transmission 2003
voltage-dependent anion channel in guard cell plasma membrane 3569
IpaB
of *Shigella flexneri*, causes entry into epithelial cells and escape from the phagocytic vacuole 1991
IRS-1
activation of phosphatidylinositol 3′ kinase during insulin signal transduction 3469
IS*903*
binding of transposase to its inverted repeat *in vitro* 3449

Jun
and Fos, binding to AP-1 motif, stimulation 653
redox activation by AP endonuclease 3323

Kainate
high affinity receptor 1651

***lac* operator–repressor**
Escherichia coli, control of tobacco gene expression 1251
Lac repressor
effect of replacing helix–turn–helix motif with lambda cro HTH motif 3031
***lac* UV_5 promoter**
DNA deformation in nucleoprotein complexes between cyclic AMP receptor protein, RNA polymerase and *lac* UV_5 promoter 2619
Laccase
transcription, mechanism of suppression of in hypovirulent *Cryphonectria parasitica* 4539
α-lactalbumin
cytoplasmic delivery of ribozymes leads to reduction in α-lactalbumin mRNA levels in mouse C127I cells 4411
Lambda cro
effect of replacing Lac repressor HTH motif with lambda cro HTH motif 3031
Lamin B receptor
is associated with a protein kinase and nuclear lamins 4027
Laminin
Drosophila, expression of A chain during embryogenesis 4519
Leader peptide
of RepA, translation of is inhibited by antisense RNA 2675
Leader RNA
of Rous sarcoma virus, role of open reading frames in translation and genome packaging 3747
Lectins
concanavalin A, precursor, activation 1297, 1303
Leishmania
amplification as a mechanism of antifolate resistance 3601
Leishmania major
developmental modification of lipophosphoglycan during differentiation of 3593
Lentiviruses
HIV can infect cells in cell cycle arrest 3053
primate, evolution of 3405
Leupeptin
inhibits intracellular transport in invariant chain breakdown of MHC class II molecules 411
LFB1/HNF1
role of POU domain in determining DNA binding specificity of 4119
Ligand-gated ion channel
$GABA_A$ receptor, effect of mutations on pharmacological properties 2017
Light
and ABA regulate *Craterostigma plantagineum* desiccation tolerance gene 2771
regulation of *Fed-1* gene transcription 2311
Limb development
chick, epithelial–mesenchymal interactions and *Hox-4* genes 1451
Lipophosphoglycan
of *Leishmania major* is modified during differentiation 3593
Listeria monocytogenes
*act*A virulence gene required for actin assembly in host cells 1981
Lung cancer cells
transcription regulation by p53 1383
Lysophosphatidic acid
identification of a putative membrane receptor for using photoaffinity labelling 2495
Lysosomal acid phosphatase
characterization of internalization signal for endocytosis 4391

Macrophage colony stimulating factor
activates phosphatidylcholine hydrolysis by cytoplasmic phospholipase A_2 4917
Macrophage colony stimulating factor receptor
binding to phosphatidylinositol 3′ kinase, role of Src homology domains 1365
Macrophages
HIV can infect cells in cell cycle arrest 3053
Maize
Adh1 gene expression, role of TATA box 157
analysis of *iojap* mutants 4037
mitochondrial *atp1* promoter 1065
Major histocompatibility complex
class II, effect of pH on binding of peptides 2829
evolution of 829
regulatory region required for *H-2K*^{b} transcription 4591
Major histocompatibility complex class I genes
transcription regulation, role of interferon regulatory factor 1 185
Malaria
Plasmodium falciparum Pf11-1 gene product is gametocyte- specific 2293
Mammary tumour virus
mouse, long terminal repeat encodes transmembrane glycoprotein 1901
Mannosyltransferase
Saccharomyces cerevisiae OCH1 encodes a novel membrane bound mannosyltransferase 2511
MAP kinase
activates at least two distinct protein kinases 3985
activation by protein threonine/tyrosine kinase from insulin-stimulated skeletal muscle 2123
phosphorylation of $p42^{MAPK}$ after fertilization of clam oocytes 3963
transforms tau protein into Alzheimer-like state 2131

MAP kinase activator
of *Xenopus*, role of in phosphorylation cascade 973
Xenopus laevis, activation of 2903
Marmoset
colour vision, genetic basis of polymorphism in photopigments 2039
Mating factor
Coprinus cinereus A mating type factor, contains POU domain 1805
Mechanosensation
in *Caenorhabditis elegans*, *mec-7* β-tubulin gene expression in touch receptor neurons 2885
Mecillinam
resistance to, associated with mutations in aminoacyl-tRNA synthetases 1493
Mefloquine
effect of deamplification of *pfmdr1* gene on chloroquine and mefloquine resistance 3067
Meiosis
Aspergillus nidulans NIMA is related to mouse Nek1 protein kinase 3521
coiled-coil protein specific for synaptonemal complex of meiotic prophase chromosomes 5091
double-strand breaks in *Saccharomyces cerevisiae* chromosomes 3441
Meiosis reinitiation
in starfish oocytes, relocation of $p34^{cdc2}$ complex with cyclin B 1763
Meiotic maturation
Xenopus laevis, identification and early activation of $p70^{s6k}$ 1743
Melanogenesis
DOPAchrome tautomerase encoded by mouse *TRP-2* 519, 527
Melanoma
Xiphophorus malignant, Xmrk receptor tyrosine kinase is activated in 4239
Membrane biogenesis
Saccharomyces cerevisiae 107
Membrane channel
Aeromonas hydrophila aerolysin, mechanism of formation of 2457
Membrane flow
into and out of Golgi apparatus in *Saccharomyces cerevisiae*, role of *ERD2* 4187
Membrane insertion
photosystem I subunit II 79
Membrane proteins
role of *Saccharomyces cerevisiae* Bos1p in ER to Golgi transport 3609
Thermotoga maritima Ompα spans periplasmic space 4369
Membrane spanning proteins
Saccharomyces cerevisiae OCH1 encodes a novel membrane bound mannosyltransferase 2511
Membrane structure
primary and secondary structure of *Entamoeba histolytica* pore-forming peptide 3501
Membrane translocation
of acidic fibroblast growth factor fusion protein with diphtheria toxin A fragment, membrane translocation of 4835
Membrane transporter
vacuolar, *Schizosaccharomyces pombe*, role in heavy metal tolerance 3491
Mesembryanthemum crystallinum
mechanisms of tolerance of osmotic stress 2077
Mesoderm induction
by basic fibroblast growth factor, modified by Xwnt-8 33
Metallothioneins
homology to human growth inhibitory factor 4843
Metamorphosis
in *Drosophila*, temporal co-ordination of gene expression by ecdysone 4083
Metastasis
association with mutations in p53 3935
Methyl-CpG binding protein
role in transcription repression 327
3-methyladenine
expression of *Escherichia coli tag* gene in mammalian cells, effect of 4439
Methylation
DNA methyltransferase is activated by cleavage of a Zn binding regulatory domain 2611
effect of expression of *Escherichia coli* 3-methyladenine *tag* gene in mammalian cells on sensitivity to methylating agents 4439
modular nature of target recognizing domains in DNA methyltransferases 4445
role of cytosine methylation in *Ascobolus immersus* gene silencing 4451
MHC class II
transcription is regulated by NF-Y 3315
MHC class II molecules
intracellular transport in invariant chain breakdown, inhibited by leupeptin 411
Microfilaments
phosphorylation of *Physarum polycephalum* actin 3185
β_2-microglobulin
deficiency, γδ T cell development 25
Microtubules
effect of phosphorylation on *Xenopus* p220 microtubule binding activity during cell cycle 3977
Microtubule bundling
by tau protein, analysis of domains required for 3953
Microtubule severing
characterization of MPF-dependent microtubule severing activity in *Xenopus* 4723
Minichromosomes
retroviral integration *in vitro* 291
Mitochondria
import of cytochrome *c* haem lyase 449
import of cytochrome c_1 into, ATP requirements of 4787
plant, import of tRNA 1291
protein import into, role of *Saccharomyces cerevisiae MPI1* gene 3619
mRNA editing complexes in *Trypanosoma brucei* mitochondria 4429
sequence-specific Endo.*Sce*I initiates recombination at its cutting site in *Saccharomyces cerevisiae* mitochondria 2707
Mitochondrial DNA
replication in *Saccharomyces cerevisiae*, homologue of *Escherichia coli* SSB DNA binding protein 3421
replication of, *Saccharomyces cerevisiae MIP1* mutants with deficient proofreading exonucleolytic activity 2717
Mitochondrial intermediate peptidase
rat, purification and characterization of 2803
Mitochondrial processing peptidase
in potato, is part of cytochrome *c* reductase 3219
Mitochondrial RNA processing RNA
7-2 RNA is associated with higher order structures in the nucleolus 3737
Mitosis
exit from, role of cdc2 dephosphorylation 2381
inhibition by *Saccharomyces cerevisiae CDC6* 2167
Schizosaccharomyces pombe, negative regulation by *pup1* and *pyp2* PTPases 4943
Schizosaccharomyces pombe, role of *pyp3* protein tyrosine phosphatase in dephosphorylation of $p34^{cdc2}$ 4933
timing of phosphorylation of glial fibrillary acidic protein 2895
Mnt repressor
interaction with DNA 215
Molecular evolution
immunoglobulins 603
Mos
CSF and transforming activities of Mos occur at different times in cell cycle 2447
stability of during *Xenopus* meiotic oocyte maturation, factors affecting 2433
Motor neurons
expression of *Drosophila* serotonin receptor 7
Mouse
β_2-microglobulin deficient, development of γδ T cells 25
albino deletion c^{14CoS}, effect on albumin and α-fetoprotein transcription 127
alternative splicing of *Hox-2.7* homeobox gene 1825
Hox-4 genes 1459
cDNAs homologous to *Saccharomyces cerevisiae CDC25* 4007

characterization of 5HT5 serotonin receptor 4779
characterization of DJH structures in mouse fetal liver 1891
collagen mutation, complementation by yeast artificial chromosomes 417
cytoplasmic delivery of ribozymes leads to reduction in α-lactalbumin mRNA levels in C127I cells 4411
effect of disruption of CD2 gene 4329
Emx1 and *Emx2* homeobox genes, are related to *Drosophila empty spiracles* 2541
expression of Sox-5 during spermatogenesis 3705
homologue of *Saccharomyces cerevisiae CDC25* 2151
homologue of *Saccharomyces cerevisiae* CDC48 3533
Hox-4.2, transcription activation by 3673
interferon-β, three-dimensional crystal structure 3193
mammary tumour virus long terminal repeat encodes transmembrane glycoprotein 1901
Nek1 protein kinase is related to *Aspergillus nidulans* NIMA 3521
peroxisome proliferator activated receptor, recognizes 5′ sequence upstream of acyl CoA oxidase gene 433
production of interleukin 2 antagonists by mutation 3905
trisomy 16, dysregulation of gene expression 619
TRP-2 encodes DOPAchrome tautomerase 519, 527
two distinct functional high affinity interleukin-3 receptors 1875
UBF, mechanism of nucleolar targeting of 3695

MPF
characterization of MPF-dependent microtubule severing activity in *Xenopus* 4723

Multidrug resistance
P-glycoprotein and cystic fibrosis genes have complementary expression patterns 4291

Murine leukaemia virus
integration into minichromosomes *in vitro* 291

Muscle
vertebrate, thick filament assembly, role of titin 1711

Muscle gene activation
role of *Xenopus* E12 DNA binding protein 2981

Mutators
Saccharomyces cerevisiae MIP1 mutants with deficient proofreading exonucleolytic activity 2717

MxA protein
role in resistance to influenza virus and vesicular stomatitis virus 1657

***myb*-related genes**
functional antagonism between 4619

Myeloblastosis associated virus
proteinase, site directed mutagenesis, specificity and activity 1141

Myelomonocytic growth factor
chicken, expression, regulation 115

Myf-5
domains required for muscle-specific transactivation 1843

Myl
fusion proteins in acute promyelocytic leukaemia, characterization 629

Myo-inositol *O*-methyl transferase
role in tolerance of osmotic stress in *Mesembryanthemum crystallinum* 2077

Myogenesis
muscle-specific transactivation by Myf-5, domains required for ¡843

Myosin
subdomains responsible for interaction with actin and for filament assembly 4715

Myosin light chain gene
novel regulatory, as a marker to distinguish adult bone marrow and fetal liver pre-B cells 2759

N-*myc*
gene expression and heir-1 HLH gene expression are mutually exclusive 2563
surface IgM mediated regulation of *RAG* gene expression in Eμ−N-*myc* B cell lines 2727

N-terminal acetyltransferase
Saccharomyces cerevisiae, activity requires interaction of *ARD1* and *NAT1* products 2087

Na,K-ATPase
mutation confers ouabain resistance 1681

Na^+-Ca^{2+} exchange
in pancreatic B cells 2877

Na/Ca,K-exchanger
from bovine rod photoreceptor, primary structure of 1689

Nerve growth factor
interactions with neurotrophin-3 917

neu
activation 923
proto-oncogenic and oncogenic forms, 3D structure of transmembrane region 43

Neuraminidase
influenza virus strain B, X-ray crystallography 49
some members of a *Trypanosoma cruzi* gene family encode proteins with both *trans*-sialidase and neuraminidase 3837

Neuroblastoma
N-*myc* gene expression and heir-1 HLH gene expression are mutually exclusive 2563

Neurogenesis
Drosophila, cell adhesion molecule 391
neuronal specificity of α7 nicotinic acetylcholine receptor promoter develops during 4529
regulation of *Drosophila Scabrous* by Ultrabithorax proteins 3375

Neurohypophyseal diabetes insipidus
human autosomal dominant, missense mutation in AVP-NP precursor gene 19

Neuromuscular transmission
recording currents through single ion channels 2003

Neuronal receptors
binding of neurotrophin-3 917

Neurophysin
AVP-NP precursor gene, missense mutation in human autosomal dominant neurohypophyseal diabetes insipidus 19

Neurospora crassa
cytochrome *c* haem lyase, import into mitochondria 449
hyphal elongation requires *cot-1*, which encodes a protein kinase 2159

Neurotransmitter release
inhibition of by tetanus toxin depends on zinc 3577

Neurotrophin-3
binding of to neuronal receptors 917

Neutron scattering
analysis of *Escherichia coli* ribosome structure 373

NF-κB
activation by hepatitis B virus MHBs^t transactivator 2991
p105 precursor contains ankyrin-related repeats similar to those in IκB 3003
p65 subunit, and C-Rel, heterodimerization 205
v-*rel* fusion protein with oestrogen receptor allows regulation of v-*rel* oncoprotein activity by 4641

NF-Y
regulates transcription of MHC class II and albumin genes 3315

Nicotiana plumbaginifolia
suppression of β-1,3-glucanase transgene expression 2595

Nicotiana tabacum
gene expression, control by *Escherichia coli lac* operator−repressor 1251

NIMA
Aspergillus nidulans, is related to mouse Nek1 protein kinase 3521

NMR spectroscopy
3D structure of *neu* proto-oncogenic and oncogenic forms 43

Non-homologous recombination
preferred site for adeno-associated virus integration by non-homologous recombination 5071

Nonsense codon
β-globin mRNA containing nonsense codon is degraded 3271

Nuclear factor I
role in adenovirus DNA replication 751

Nuclear hormone receptors
transcription activation by 1025

Nuclear localization signal
co-operation of proto-NLSs in ER and PR 3681
in human poly(ADP-ribose) polymerase 3263

Nuclear matrix
identification of MARs in Epstein−Barr virus 1165
is attached to telomeres of human chromosomes 717

Nuclear receptor genes
evolution of superfamily 1003
Nucleocapsid assembly
initiation of in hepatitis B virus 3413
Nucleocapsid protein
HIV-1 NCp7, structure of 3059
Nucleolar targeting
of murine UBF, mechanism of 3695
Nucleolus
mitochondrial RNA processing RNA is associated with higher order structures 3737
Nucleoporin
Saccharomyces cerevisiae, identification of new subclass of 5051
Nucleoside diphosphate kinase
Dictyostelium discoideum, X-ray structure of 3203
Nucleosomes
mobility of in 5S rDNA 2951
transcription through by T7 RNA polymerase *in vitro* 1941
Nucleosome positioning
and retroviral integration into minichromosomes *in vitro* 291
in *Saccharomyces cerevisiae* minichromosomes 1187
Nucleotide binding proteins
T-cell receptor ζ chain 933

Ocytocin
evidence for presence of a secondary structure at processing site of pro-ocytocin 2399
Oestrogen receptor
fusion protein with v-*rel* allows regulation of v-*rel* oncoprotein activity by hormone and binds to NF-$\varkappa$B 4641
transcription activation by 1025
2′-5′oligoadenylate synthetase
transcription regulation, role of interferon regulatory factor 1 185
Oligosaccharyl transferase
Saccharomyces cerevisiae, activity requires *WBP1* 2071
Oncogene collaboration
115
Oncoproteins
$p21^{ras}$ activates ERK2 569
Oocyte maturation
Xenopus, requirements for polyadenylation of maternal mRNA 5021
Xenopus meiotic, factors affecting stability of Mos 2433
Osmotic stress
mechanisms of tolerance of in *Mesembryanthemum crystallinum* 2077
Osteogenesis
role of osteogenic growth peptide, a histone H4-related molecule 1867
Osteogenic growth peptide
role in osteogenesis and similarity to histone H4 1867
Ouabain
resistance to, conferred by Na, K-ATPase mutation 1681
2-oxoglutarate dehydrogenase complex
sequences directing E3 binding are located on E1 component 3229

P-glycoprotein
and cystic fibrosis genes have complementary expression patterns 4291
$p21^{ras}$
activates ERK2 569
mediates control of *IL-2* gene promoter function in T cell activation 4549
$p34^{cdc2}$
complex with cyclin B, relocation of at meiosis reinitiation 1763
dephosphorylation of, role of *pyp3* protein tyrosine phosphatase 4933
phosphorylation of rab4 determines rab4 localization during cell cycle 4379
$p34^{cdc2}$ kinase
family of related protein kinases 2909
phosphorylation of glial fibrillary acidic protein 2895
$p50^{csk}$
regulates $p56^{lck}$ activity 2919
p53
analysis of mutations in HPV^+ cervical carcinoma 3935
as transcriptional regulator, effect of mutations in lung cancer cells 1383
effect of p53−HPV E6 interaction on p53-mediated repression of transcription 3045
interaction with and regulation of conformation by hsp70 3513
interaction with p95, role in tumour suppression 2115
transactivation by, is inhibited by HPV-16 E6 oncoprotein and SV40 large T antigen 5013
p55
tumour necrosis factor receptor, effect of cytoplasmic truncation 943
$p56^{lck}$
activity is regulated by $p50^{csk}$ 2919
overexpression of inhibits T cell receptor β-chain gene rearrangement 4877
p58
is associated with a protein kinase and nuclear lamins 4027
$p59^{fyn}$
role in T cell receptor signal transduction 4887
p68 kinase
human, inhibits growth of *Saccharomyces cerevisiae* 1553
$p70^{s6k}$
identification and early activation following progesterone-induced meiotic maturation in *Xenopus laevis* 1743
Palmitoylation
blocks G_o activation by GAP-43 2095
Papillomavirus
analysis of p53 mutations in HPV^+ cervical carcinoma 3935
BPV-1 E5 protein forms complex with PDGF receptor and 16 kDa membrane pore forming protein 4851
effect of p53−HPV E6 interaction on p53-mediated repression of transcription 3045
HPV-16 E6 oncoprotein inhibits transactivation by p53 5013
HPV18 early gene expression 4607
human, E7−E6 fusion proteins, targeted degradation of retinoblastoma protein by 2425
role of protein phosphatase 2A PR55 subunit in activation of HPV16 long control region 4601
transactivation and DNA replication functions of BPV-1 E2 are separate 4111
Paramecium
analysis of introns in β-tubulin genes 3713
Paramecium primaurelia
illegitimate DNA recombination, hotspots in interstitial telomeres 725
Paramyxovirus
tropism in chick embryo, role of factor X expression 467
Parvovirus
preferred site for adeno-associated virus integration by non-homologous recombination 5071
Pattern formation
in *Dictyostelium discoideum*, role of DIF-1 2849
PC3
homology with BTG1 1663
Pea
proteins involved in proteolytic processing of precursors targeted to chloroplast 4401
Penicillin binding protein 2
effect of ppGpp 1493
Penicillin resistance
related penicillin binding protein 1a genes in different penicillin resistant isolates of *Streptococcus pneumoniae* 3831
Peptide chain release factor
mammalian, homology with cDNA induced by interferon γ 489
Peripherin
cis regulation of transcription 2971
Periplasmic chaperones
required for pilus biogenesis, have immunoglobulin-like features 1617
Petunia
tissue-specific DNA binding protein 241
pH
effect on binding of peptides to major histocompatibility complex class II 2829
Phase variation
Salmonella flagellar 2695
Phaseolus vulgaris
tRNA, import into *Solanum tuberosum* mitochondria 1291
PHO4
amino acids involved in specificity of binding to DNA 4103

Phorbol esters
elements required for phorbol ester induction of urokinase-type plasminogen activator transcription 4573
induce AP-1 binding to DNA 2241
Phosphatase
Salmonella typhimurium phoN, horizontal gene transfer 1309
Phosphatidylcholine
hydrolysis by cytoplasmic phospholipase A_2, is activated by macrophage colony stimulating factor 4917
Phosphatidylglycerol
role in *Arabidopsis thaliana* chilling sensitivity 4685
Phosphatidylinositol 3′ kinase
activation by IRS-1 during insulin signal transduction 3469
binding to macrophage colony stimulating factor receptor, role of Src homology domains 1365
binding to platelet-derived growth factor receptor, tyrosine phosphorylation requirements 1373
interaction of p85 subunit and N-terminal SH2 domain of with a platelet-derived growth factor recept 4261
Phospholipase A_2
cytoplasmic, hydrolysis of phosphatidylcholine is activated by macrophage colony stimulating factor 4917
Phospholipase C-γ
interaction with platelet-derived growth factor β receptor, PDGF β receptor autophosphorylation sites involved in 3911
Phosphorylation
and changes in *Xenopus* p220 microtubule binding activity during cell cycle 3977
casein kinase II phosphorylates topoisomerase II 1785
casein kinase II sites in serum response factor, effect on DNA binding 97
comparison of tyrosine phosphorylation by IL-3 and IL-4 4899
factors affecting stability of Mos during *Xenopus* meiotic oocyte maturation 2433
immunoglobulin heavy chain binding protein 63
MAP kinase activates at least two distinct protein kinases 3985
mouse valosin containing protein is tyrosine phosphorylated in response to TCR activation 3533
negative regulation of *Schizosaccharomyces pombe* mitosis by *pup1* and *pyp2* PTPases 4943
of CREB by protein kinase A, effects of 3337
of cytokine receptors, domains of β subunit of receptor required for 3541
of glucocorticoid receptor during cell cycle 3457
of host cell proteins induced in host cells during invasion of enteropathogenic *Escherichia coli* 3551
of IRS-1 during insulin signal transduction 3469
of $p42^{MAPK}$ after fertilization of clam oocytes 3963
of rab4 by $p34^{cdc2}$, determines rab4 localization during cell cycle 4379
of RPA-32, timing of during cell cycle 2177, 2189
of serum response factor, effect on transcription of c-*fos* 1045
of UBF by casein kinase II is required for transcription activation 2211
on tyrosine in response to EGF: single amino acid substitution in epidermal growth factor receptor modifies mutagenic properties 3927
Physarum polycephalum actin 3185
platelet-derived growth factor β receptor autophosphorylation sites involved in interaction with phospholipase C-γ 3911
regulation of CDK2 activity during cell cycle 3995
required for ATPase activity of NTRC transcriptional activator 2219
role in association of CD44 with cytoskeleton 4733
role of *Schizosaccharomyces pombe pyp3* protein tyrosine phosphatase in dephosphorylation of p34 4933
Photoaffinity labelling
identification of a putative membrane receptor for lysophosphatidic acid 2495
Photoheterotrophic growth
in *Rhodobacter sphaeroides*, *pufX* is required for light- driven cyclic electron transfer 2779
Photopigments
marmoset, genetic basis of polymorphism 2039
Photoreceptor
bovine rod, primary structure of Na/Ca, K-exchanger 1689
Photosynthetic reaction centre
Rhodopseudomonas viridis, site-specific mutagenesis 777
Photosystem I
subunit II, biogenesis and assembly 79
Physarum polycephalum
actin phosphorylation sites 3185
Picornavirus
translation, usage of dual initiation sites 1105
Picrotoxinin
M2 segment of β subunit confers picrotoxinin resistance to inhibitory glycine receptor channels 4305
Pili
Escherichia coli PapC, similarity to *Bordetella pertussis* filamentous haemagglutinin 3175
role of periplasmic pilus chaperone in assembly of 4747
Pilus biogenesis
periplasmic chaperones have immunoglobulin-like features 1617
Pisum sativum
regulation of *Fed-1* gene transcription, analysis in transgenic tobacco 2311
Plasma membrane
voltage-dependent anion channel in guard cell plasma membrane 3569
Plasmid DNA
Escherichia coli, production of 'staggered' head-to-head dimers, may involve Tn*3* transposase 1965
Plasmid R1
control of replication, role of antisense RNA 1195
mapping of the *in vivo* start site for leading strand synthesis in 4481
regulation of replication 2675
Plasmodium falciparum
effect of deamplification of *pfmdr1* gene on chloroquine and mefloquine resistance 3067
mapping transcription termination and initiation sites using yeast artificial chromosomes 1949
Pf11-1 gene product is gametocyte-specific 2293
Platelet activation
role of $pp60^{c\text{-}src}$ 855
Platelet-derived growth factor
and actin reorganization 543
crystal structure of BB homodimer 3921
interaction of p85 subunit and N-terminal SH2 domain of phosphatidylinositol 3-kinase with a PDGF receptor phosphorylation site 4261
PDGF receptor forms complex with BPV-1 E5 protein and 16 kDa membrane pore forming protein 4851
structural and functional studies on 4251
Platelet-derived growth factor β receptor
autophosphorylation sites involved in interaction with phospholipase C-γ 3911
Platelet-derived growth factor receptor
binding to Ras GTPase activator protein and phosphatidylinositol 3′ kinase, tyrosine phosphorylation requirements 1373
signal transduction 543
PML
fusion proteins in acute promyelocytic leukaemia, characterization 629
heterogeneous PML/RARα transcripts in acute promyelocytic leukaemia 1397
Poliovirus
RNA recombination, RT-PCR used to detect recombinant RNA molecules 3135
Poly(ADP-ribose) polymerase
human, deletion and site-directed mutagenesis 3263
Polyadenylation
during *Xenopus* oocyte maturation 5021
HIV 1513
of *Caenorhabditis elegans fem-3* RNA 2303
regulates translation of amyloid protein precursor 3099
requirements for HIV-1 pre-mRNA processing 4419
Polymerase chain reaction
RT-PCR used to detect RNA recombination in poliovirus 3135
Polynucleotide phosphorylase
Escherichia coli, autoregulated expression of by an RNase III dependent mechanism 2633
Polyoma virus
transcription regulation, role of T antigen and DNA replication 177

Polytene chromosomes
Drosophila melanogaster Polycomb and polyhomeotic products form multimeric protein complex 2941
Pore-forming peptide
of *Entamoeba histolytica*, primary and secondary structure of 3501
Post-transcriptional regulation
maize *Adh1*, role of TATA box 157
of *Caenorhabditis elegans fem-3* gene 2303
suppression of β-1, 3-glucanase transgene expression in homozygous *Nicotiana plumbaginifolia* 2595
Post-translational modification
immunoglobulin heavy chain binding protein 63
Post-translational processing
concanavalin A 1297, 1303
Potassium channel
rat brain, is related to *Drosophila Shaw* gene 2473
Xenopus, different types of are generated by different levels of a single mRNA 2465
Potato
mitochondrial processing peptidase is part of cytochrome *c* reductase 3219
Potato leafroll virus
ribosomal frameshifting, frequency of frameshift and effect on expression of replicase 1111
POU domain
dictates DNA binding specificity of LFB1/HNF1 4119
in *Coprinus cinereus A* mating type factor 1805
POU domain family
of transcription factors, characterization of rat Brn-4 2551
pp60$^{c\text{-}src}$
role of in signal transduction 855
ppGpp
and resistance to mecillinam 1493
Pre-mRNA binding proteins
interaction of hnRNP C with RNA 3289
Pre-mRNA processing and export
in *Saccharomyces cerevisiae* 3279
Pre-mRNA splicing
role of *Saccharomyces cerevisiae* PRP8 in assembly of spliceosomes 3721
Saccharomyces cerevisiae, subnuclear localization of PRP6p splicing protein 3731
Pre-rRNA processing
possible role of mitochondrial RNA processing RNA 3737
Pre-tRNA^{Tyr}
Arabidopsis, structural and sequence requirements of pseudouridine 35 biosynthesis in 1907
Prepro-enkephalin
expression in chondrocytes 135
Preprotein export
energetics of in *Escherichia coli* 847
Preterminal protein
adenovirus, heterodimer with DNA polymerase 761
Programmed cell death
role of PD-1 gene 3887
Prohormone
evidence for presence of a secondary structure at processing site of pro-ocytocin 2399
Proliferating cell nuclear antigen
Schizosaccharomyces pombe, isolation and analysis of gene encoding 5111
Prolyl 4-hydroxylase
retention of in endoplasmic reticulum, effect of site directed mutagenesis of protein disulphide isomerase 4213
Promoter
α7 nicotinic acetylcholine receptor, neuronal specificity of develops during neurogenesis 4529
activation and repression mediated by *Drosophila dorsal* 1837
Escherichia coli fis, is subject to stringent control 1075
mitochondrial, maize *atp1* 1065
of peripherin gene, *cis* regulation 2971
p21^{ras} mediates control of *IL-2* gene promoter function in T cell activation 4549
region involved in regulation of β-globin subtype switching 2961
Promoters
transcription factor activation domains involved in proximal and remote activation 4961
Proofreading
Saccharomyces cerevisiae MIP1 mutants with deficient proofreading exonucleolytic activity 2717
Protease
Escherichia coli Clp, effect on bacteriophage Mu virulence 5121
Proteasome
role in ubiquitin pathway of protein degradation 3077
Thermoplasma acidophilum, subunit structure 1607
Protein–DNA interaction
Antennapedia homeodomain, inhibition by distamycin 279
binding of IS*903* transposase to its inverted repeat *in vitro* 3449
Escherichia coli HU modulates the binding of IHF to *oriC* 4489
high mobility group proteins, HMG boxes and DNA binding 1055
human SRY HMG box recognizes four-way DNA junctions irrespective of sequence 4497
regulation of *Escherichia coli cdd* promoter by cyclic AMP–CRP 3635
sequence-specific interaction of *Salmonella* Hin recombinase with DNA 2695
steroid hormone receptors 1409, 1419
Protein–protein interaction
role in DNA replication 769
Saccharomyces cerevisiae ARD1 and *NAT1* products 2087
steroid hormone receptors 1409, 1419
Protein–RNA interaction
HIV-1 Rev basic peptide 1119
Protein 4.1
linkage to erythrocyte anion exchanger, domains involved in 2863
Protein degradation
Escherichia coli, role of chaperonin dnaK 71
factors affecting stability of Mos during *Xenopus* meiotic oocyte maturation 2433
role of ubiquitin conjugating enzyme 367
ubiquitin as a signal for degradation 497
ubiquitin pathway, role of proteasome 3077
Protein disulfide isomerase
effect of site directed mutagenesis on retention of prolyl 4-hydroxylase in endoplasmic reticulum 4213
Protein folding
Escherichia coli alkaline phosphatase, requires *ppfA* gene 57
GroEL-mediated, role of interaction with GroES 4757
manipulation of in endoplasmic reticulum 1717
role of TRiC 4767
tight folding prevents membrane translocation of acidic fibroblast growth factor fusion protein with 4835
Protein import
ATP requirements of cytochrome c_1 import into mitochondria 4787
Escherichia coli colicin A unfolds during translocation 441
into *Saccharomyces cerevisiae* mitochondria, role of *MPI1* gene 3619
Neurospora crassa, import of cytochrome *c* haem lyase 449
potato mitochondrial processing peptidase is part of cytochrome *c* reductase 3219
Protein kinase A
phosphorylation of CREB, effects of 3337
Protein kinases
a protein kinase and nuclear lamins are associated with p58 4027
CaMKII, effect of truncation on cell cycle 507
cAMP dependent protein kinase regulation of calcium influx 891
cAMP-dependent, role in glycogen metabolism regulation 87
cyclin A- and cyclin B-dependent, have differing mechanisms of regulation in *Xenopus laevis* egg extracts 1751
encoded by *Neurospora crassa cot-1*, is required for hyphal elongation 2159
family of kinases related to p34^{cdc2} kinase 2909
kinase-like domain in novel *CDC* gene involved in G_2 phase control in *Saccharomyces cerevisiae* 4017
MAP kinase activates at least two distinct protein kinases 3985
MAP kinase activation by protein threonine/tyrosine kinase 2123
MAP kinase transforms tau protein into Alzheimer-like state 2131
mouse Nek1 is related to *Aspergillus nidulans* NIMA 3521
phosphorylation regulates CDK2 activity during cell cycle 3995
Saccharomyces cerevisiae STE20 gene product is required for $G_{\beta\gamma}$-mediated signal transduction 4815
Protein phosphatase 1
Arabidopsis thaliana, complements *Schizosaccharomyces pombe* cs *dis2*-11 mutant 1327
Saccharomyces cerevisiae, regulation 87

Protein phosphatase 2A
PR55 subunit, role of in activation of HPV16 long control region 4601
Protein phosphorylation
and G_2-M progression 507
casein kinase II phosphorylates and activates mammalian DNA ligase I 2925
role in activation of *Xenopus laevis* MAP kinase activator 2903
tau protein, role in switch to 'Alzheimer state' 1593
Protein processing
LAR protein tyrosine phosphatase 897
Protein retention
in endoplasmic reticulum, signals for 2345
Protein secretion
in *Escherichia coli*, genetic analysis of 3165
Protein structure–function
acetylcholinesterase 3561
Protein synthesis
inhibitors of, mechanisms of superinduction of c-*fos* and c-*jun* 2415
Protein targeting
ER to Golgi, *Saccharomyces cerevisiae*, requires *SEC20* gene product 423
of cytochrome b_5 to endoplasmic reticulum, signal sequence responsible for 4197
poly(ADP-ribose) polymerase contains nuclear localization signal 3263
role of clathrin in sorting of vacuolar proteins in Golgi 2811
to thyroid epithelium, pathways of 2337
Protein translocation
Escherichia coli colicin A unfolds during translocation 441
Iga-mediated 2327
regulation of transcription of *Saccharomyces cerevisiae KAR2* 2583
Protein tyrosine kinase
overexpression of $p56^{lck}$ inhibits T cell receptor β-chain gene rearrangement 4877
Protein tyrosine phosphatase
LAR, protein processing removes CAM-like region 897
Proteinase
HIV-1 and myeloblastosis associated virus, site directed mutagenesis, specificity and activity 1141
Proteolysis
extracellular proteolytic cleavage by urokinase is required for hepatocyte growth factor activation 4825
Proteolytic processing
of precursors targeted to pea chloroplast, proteins involved in 4401
Proto-oncogenes
c-*ets*-1, gene product, DNA binding, inhibition 643
c-*ets*-1, pre-mRNA processing 1095
c-*fos*, ternary complex formation over serum response element 3011
c-*jun*, transcription regulation 1479
fms, activating mutations 551
neu, activation 923
Protonmotive force
and translocation in *Escherichia coli* 847
PRP16
is required for conformational rearrangement in *Saccharomyces cerevisiae* spliceosome 5033
Pseudomonas syringae
Arabidopsis thaliana hypersensitive response to, role of *EL13* and *RPM1* genes 4677
Pseudouridine 35
biosynthesis in pre-$tRNA^{Tyr}$, structural and sequence requirements of 1907
Puromycin
biosynthesis, gene cluster 785
Pyruvate dehydrogenase complex
similar lipoyl-like domains in E1 component 3229
Pyruvate kinase
Saccharomyces cerevisiae, co-operative binding to fructose-1,6-bisphosphate 3811

Qβ replicase
possible mechanism of RNA recombination *in vitro* 5129
Quinol oxidase
Escherichia coli, complex with cytochrome *c* oxidase, insertion of copper binding site into 3209

rab4
localization during cell cycle is determined by phosphorylation 4379
RAD6 (UBC2)
Saccharomyces cerevisiae, properties of chimeric CDC34–RAD6 protein 3091
RAS
activation, mouse homologue of *Saccharomyces cerevisiae CDC25* 2151
residues involved in conversion from GDP- to GTP-bound form 2855
Ras activator
Saccharomyces cerevisiae CDC25, homologous cDNAs in mouse 4007
Ras GTPase activator protein
binding to platelet-derived growth factor receptor, tyrosine phosphorylation requirements 1373
Rat
Brn-4, a novel member of the POU domain family of transcription factors 2551
potassium channel family is related to *Drosophila Shaw* gene 2473
purification and characterization of mitochondrial intermediate peptidase 2803
stomach fundus serotonin receptor, cloning and functional characterization 3481
RBP1/REB1
Saccharomyces cerevisiae rDNA binding protein, function of 4665
RecA
Escherichia coli, unusual stability of intermediates made by 2685
Receptor
identification of a putative membrane receptor for lysophosphatidic acid using photoaffinity labelling 2495
Receptor tyrosine kinase
encoded by *neu*, role of transmembrane domain in signal transduction 923
Xiphophorus Xmrk, is activated in malignant melanoma 4239
Recombinase activating genes
surface IgM mediated regulation of *RAG* gene expression in $E\mu$–N-*myc* B cell lines 2727
Recombination
deletion type, role in V gene replacement 611
Escherichia coli, unusual stability of intermediates made by RecA 2685
sequence-specific Endo.*Sce*I initiates recombination at its cutting site in *Saccharomyces cerevisiae* mitochondria 2707
Redox activation
of Fos and Jun by AP endonuclease 3323
Reduction–oxidation
role in binding of Fos and Jun to AP-1 motif 653
Reed–Sternberg cells
overexpression of intermediate filament associated protein in Hodgkin's disease 2103
RepA
translation of leader peptide is inhibited by antisense RNA 2675
Replication
of plasmid R1, regulation of 2675
of *Saccharomyces cerevisiae* mitochondrial DNA, *MIP1* mutants with deficient proofreading exonucleolytic activity 2717
Replication origin
activation of by DNA looping 1205
Replication protein A
SV40 T antigen and DNA polymerase α, protein–protein interaction, role in DNA replication 769
Repressor–operator interaction
effect of replacing Lac repressor helix–turn–helix motif with lambda cro HTH motif 3031
preferred target DNA of *trp* repressor 3021
Restin
a novel intermediate filament associated protein 2103
Restriction–modification systems
type IC restriction enzymes, sequence specificity 233
Restriction enzymes
type IC, variation in sequence specificity 233
Reticuloplasmins
signals for protein retention in endoplasmic reticulum 2345
Retinoblastoma
cdc2 transcription repression by retinoblastoma susceptibility gene product 1797

Retinoblastoma protein
repression of DRTF1, is prevented by adenovirus E1a gene 2603
targeted degradation of by human papillomavirus E7–E6 fusion proteins 2425
Retinoic acid
and chick limb development 1451
and *Hox-4* genes 1459
regulation of c-*jun* transcription in embryonal carcinoma cells 167
regulation of human *HOX3D* homeobox gene 265
Retinoic acid receptor
heterodimerization 1409, 1419
heterogeneous PML/RARα transcripts in acute promyelocytic leukaemia 1397
RAR-β, effect on expression of HPV18 *E6* and *E7* genes 2283
silencing domains 1015
Retinoic acid receptor α
fusion proteins in acute promyelocytic leukaemia, characterization 629
Retrotransposition
demonstration of by *Schizosaccharomyces pombe* Tf1 element 1145
Retrotransposon
Ty1 of *Saccharomyces cerevisiae* 1155
Retroviral integration
into minichromosomes *in vitro* 291
Reverse genetics
Caenorhabditis elegans, targeted alteration of genome 287
Reverse transcriptase
HIV-1, quaternary structure of 1131
Reverse transcription
evidence for RNA-mediated transfer of *Glycine max* cytochrome *c* oxidase gene from mitochondrion to nucleus 3815
Rhodobacter sphaeroides
pufX is required for light-driven cyclic electron transfer 2779
Rhodococcus fascians
role of in fasciation induction 795
Rhodopseudomonas viridis
photosynthetic reaction centre, site-specific mutagenesis 777
Ribonucleoproteins
interaction of hnRNP C with RNA 3289
Ribonucleotide reductase
S-phase specific release from block in R2 subunit transcription 4953
Ribosomal frameshifting
potato leafroll virus and effect on expression of replicase 1111
Ribosome
orientation of mRNA, site-directed cross-linking analysis of 3105
Ribosome structure
Escherichia coli 373
Ribozyme
effect of gene expression *in vivo* 1525
Ribozymes
artificial nuclease resistant, synthesis of 1913
cytoplasmic delivery of leads to reduction in α-lactalbumin mRNA levels in mouse C127I cells 4411
Rice
GT-2 DNA binding protein binds to *phyA* promoter 4131
Rieske iron–sulphur protein
Saccharomyces cerevisiae, expression requires *BCS1* 3821
mRNA
containing extensive secondary structure, role of initiation factor eIF-4F in translation of 4153
orientation of in ribosome, site-directed cross-linking analysis 3105
rRNA
expression of the seven *Escherichia coli* rRNA operons 4175
tRNA
plant, import into mitochondria 1291
tRNA
tobacco $tRNAs^{Trp}$ suppress UGA termination codon in tobacco rattle virus 4167
snoRNA
U3, binding sites in *Saccharomyces cerevisiae* pre-rRNA 1531
RNA binding
by hnRNP U protein, motif involved in 2655
RNA binding proteins
interaction of hnRNP C with RNA 3289
RNA cleavage
induced by ribozyme gene expression *in vivo* 1525
mRNA degradation
β-globin mRNA containing nonsense codon is degraded 3271
RNA editing
in tobacco chloroplasts 1099
mRNA editing
in *Trypanosoma brucei* mitochondria 4429
tRNA genes
Saccharomyces cerevisiae, regulation of transcription by tetracycline operator–repressor 1487
RNA helicase
ATP binding and hydrolysis, regions of translation initiation factor eIF-4A involved in 2643
RNA packaging
role of open reading frames of Rous sarcoma virus leader RNA 3747
RNA polymerase
DNA deformation in nucleoprotein complexes between cyclic AMP receptor protein, RNA polymerase and *lac* UV_5 promoter 2619
evidence that DNA and RNA polymerases have similar active sites 3767
positioning of during transcription 667
T7, *in vitro* transcription through nucleosomes 1941
RNA polymerase I
Saccharomyces cerevisiae, novel system for analysis of transcription by 4665
UBF phosphorylation by casein kinase II is required for transcription activation 2211
RNA polymerase II
holdback at transcriptional start site mediates termination of c-*myc* transcription 3307
synergistic activation of transcription by multiple VP16 domains 5005
termination of transcription 1085
mRNA processing
role in autoregulated expression of *Escherichia coli* polynucleotide phosphorylase 2633
RNA processing
role of U4 and U6 snRNAs 335, 345
Pre-mRNA
histone genes, interaction with U7 snRNP and hairpin binding factors 691
Pre-rRNA
Saccharomyces cerevisiae, U3 snoRNA binding sites 1531
Pre-mRNA processing
c-*ets-1* 1095
HIV-1 3′ processing *in vitro* requires upstream element and TAR 4419
Saccharomyces cerevisiae, requires *GAR1* snRNP 673
Pre-mRNA splicing
requirements for conformational rearrangement in spliceosome 5033
RNA recombination
by Qβ replicase *in vitro*, possible mechanism of 5129
poliovirus, RT-PCR used to detect recombinant RNA molecules 3135
Saccharomyces cerevisiae, requires PRP2 splicing factor, an ATPase 2319
tRNA synthetase
Bacillus subtilis threonyl, control of gene expression by antitermination 3117
snoRNAs
Saccharomyces cerevisiae U14 RNA, deletion analysis and function of mouse–yeast hybrid molecules 683
RNase III
autoregulated expression of *Escherichia coli* polynucleotide phosphorylase by an RNase III dependent mechanism 2633
hnRNP
U protein, structure and RNA binding activity of 2655
snRNP
role of *Saccharomyces cerevisiae* PRP8 in assembly of spliceosomes 3721
Saccharomyces cerevisiae GAR1, required for pre-rRNA processing 673
U7, and hairpin binding factors, interaction with histone pre-mRNA 691
Rous sarcoma virus
role of open reading frames of leader RNA in translation and genome packaging 3747

RPA-32
timing of phosphorylation during cell cycle 2177, 2189
Saccharomyces cerevisiae
amino acid biosynthesis, sequence-specific initiator elements focus transcription initiation from the *TRP4* promoter 4583
and *Schizosaccharomyces pombe*, species specificity in chromatin structure 1177
ARD1, encodes subunit of N-terminal acetyltransferase 2087
artificial nucleosome positioning in minichromosomes 1187
CDC25, homologous cDNAs in mouse 4007
CDC25, mouse homologue 2151
CDC34 (UBC3) ubiquitin conjugating enzyme, properties of chimeric CDC34–RAD6 protein 3091
CDC34 (UBC3) ubiquitin conjugating enzyme, role in cell cycle, deletion analysis 3081
CDC48, mouse homologue of 3533
CDC6, dual role in cell cycle 2167
chromosomal DNA replication, role of DNA polymerase II 733
Cln3–Cdc28 kinase complex, regulation of by proteolysis and phosphorylation 1773
co-operative binding of fructose-1,6-bisphosphate to pyruvate kinase 3811
crystal structure of transketolase 2373
double-strand breaks induced during meiosis 3441
ER to Golgi protein targeting, requires *SEC20* gene product 423
fatty acid synthase, *FAS* genes, regulation 107
functional expression of spinach sucrose carrier cDNA 4705
GAC1 gene role in glycogen metabolism 87
GAR1 snRNP, required for pre-rRNA processing 673
GCN, homology with human p68 kinase 1553
GCN5 protein required for transcription of GCN4 and HAP2–HAP3–HAP4 4145
GPI anchors, variation in lipid component 457
hyperactivation of *GAL1* allowed by histone H3 mutations 3297
identification of new subclass of nucleoporin 5051
KAR2, regulation of transcription 2583
mutagenesis analysis of *STE4* gene product 4805
mutant with defect in endonuclease digestion of cruciform DNA 699
novel *CDC* gene involved in G_2 phase control 4017
novel system for analysis of transcription by RNA polymerase I 4665
OCH1 encodes a novel membrane bound mannosyltransferase 2511
oligosaccharyl transferase activity requires *WBP1* 2071
pre-mRNA processing and export 3279
protein targeting, role of clathrin 2811
PRP16 is required for conformational rearrangement in spliceosome 5033
putative Z-DNA binding protein 3787
replication of mitochondrial DNA, *MIP1* mutants with deficient proofreading exonucleolytic activity 2717
Rieske iron–sulphur protein, expression requires *BCS1* 3821
pre-rRNA, U3 snoRNA binding sites 1531
tRNA genes, regulation of transcription by tetracycline operator–repressor 1487
pre-mRNA splicing, requires PRP2 splicing factor, an ATPase 2319
role of Bos1p in ER to Golgi transport 3609
role of *ERD2* in membrane flow into and out of Golgi apparatus 4187
role of *HAL1* gene in salt tolerance 3157
role of *MPI1* gene in protein import into mitochondria 3619
role of PRP8 in assembly of spliceosomes 3721
Sar1 and Sec12 proteins involved in formation of transport vesicles from endoplasmic reticulum, *Arabidopsis thaliana* and *Schizosaccharomyces pombe* homologues of 4205
SEC20 gene product, required for ER to Golgi protein targeting 423
sequence-specific Endo.*Sce*I initiates recombination at its cutting site in mitochondria 2707
silent mating loci, repression of, role of histone H4 N-terminus 2201
single-stranded DNA binding protein, homologue of *Escherichia coli* SSB 3421
STE20 gene product is required for $G_{\beta\gamma}$-mediated signal transduction 4815
subnuclear localization of PRP6p splicing protein 3731
Ty1 element, structure of virus-like particles 1155
U14 RNA, deletion analysis and function of mouse–yeast hybrid molecules 683
ubiquitin conjugating enzyme, structural and functional conservation 367

SAF-A
a novel scaffold attachment factor in HeLa cells 3431
Salmonella
Hin recombinase, sequence-specific interaction with DNA 2695
Salmonella typhimurium
phosphatase *phoN* horizontal gene transfer 1309
Salt tolerance
in *Saccharomyces cerevisiae*, role of *HAL1* gene 3157
Scaffold associated region
contain topoisomerase II cleavage sites 705
Scaffold attachment factor
SAF-A, a novel scaffold attachment factor in HeLa cells 3431
Schizosaccharomyces pombe
and *Saccharomyces cerevisiae*, species specificity in chromatin structure 1177
BiP, ER retention signal 1583
cdc13 and *cdc25* homologues in *Aspergillus nidulans* 2139
cell cycle checkpoint controls, *rad-1* 1335
cell cycle checkpoint controls 1343
cs *dis2*-11 mutant, complementation by *Arabidopsis thaliana* protein phosphatase 1 1327
heavy metal tolerance, *hmt1* encodes a vacuolar membrane transporter 3491
homologues of *Saccharomyces cerevisiae* Sar1 and Sec12 proteins involved in formation of transport 4205
isolation and analysis of gene encoding proliferating cell nuclear antigen 5111
mating pheromones 951
mechanosensitive ion channel 2869
negative regulation of mitosis by *pup1* and *pyp2* PTPases 4943
new cdc gene required for S phase entry 4923
pyp3 protein tyrosine phosphatase, role in dephosphorylation of $p34^{cdc2}$ 4933
ras1 mediates pheromone-induced transcription 1391
sodium and lithium tolerance conferred by amplification of sodium ion/proton antiporter 1631
Tf1 element, demonstration of retrotransposition 1145
***SCL* gene**
is a positive regulator of erythroid differentiation 4073
SDC25 C-domain
regions of Ha-*ras* p21 required for action of 2391
Secretion
Ig L chains, and interaction with BiP 1573
role of glucose regulated protein GRP78 1563
role of *Saccharomyces cerevisiae* Bos1p in ER to Golgi transport 3609
Selenocysteine
analysis of the mRNA determinants required for the incorporation of selenocysteine into proteins 3759
Self-replicating RNA
possible mechanism of RNA recombination by Qβ replicase 5129
Sensory mother cells
abnormal division of in *Drosophila melanogaster Cyclin-A* mutant 2935
Sensory organ determination
in *Drosophila*, role of *extramacrochaetae* gene 3385
Serotonin receptor
characterization of mouse 5HT5 4779
rat stomach fundus, cloning and functional characterization 3481
Serum response element
c-*fos*, ternary complex formation over 3011
Serum response factor
DNA binding, effect of phosphorylation at casein kinase II sites 97
mechanism of formation of ternary complex of SRF, Elk-1 and SAP-1 4619
phosphorylation, effect on transcription of c-*fos* 1045
Sex determination
Caenorhabditis elegans 2303
human SRY HMG box recognizes four-way DNA junctions irrespective of sequence 4497
Sexual and asexual development
Coprinus cinereus, regulation by *A* mating type factor 1805

Shigella flexneri
invasion genes of, IpaB causes entry into epithelial cells and escape from the phagocytic vacuole 1991
Sialic acid
complex with influenza virus strain B neuraminidase, X- ray crystallography 49
Signal peptidases
prokaryotic and eukaryotic, sequence comparison 2819
Signal recognition particle
binding to signal sequences, involves SRP54 methionine- rich domain 1543
Signal sequence
responsible for targeting of cytochrome b_5 to endoplasmic reticulum 4197
Signal sequences
binding to signal recognition particle, involves SRP54 methionine-rich domain 1543
Signal transduction
by cytokine receptors, domains of β subunit of receptor required for 3541
characterization of fibroblast growth factor receptor-4 4273
domains involved in subtype specificity of tachykinin receptors 3585
$G_{\beta\gamma}$-mediated, *Saccharomyces cerevisiae STE20* gene product is required for 4815
IL-3 and IL-4 activate different signal transduction cascades 4899
induction of major histocompatibility complex class II promoter by interferon-γ, mutational analysis 1351
insulin, activation of phosphatidylinositol 3′ kinase 3469
interleukin-2 and erythropoietin receptors have distinct signal transduction mechanisms 4909
mutagenesis analysis of *Saccharomyces cerevisiae STE4* gene product 4805
$p21^{ras}$, activates ERK2 569
PDGF receptor forms complex with BPV-1 E5 protein and 16 kDa membrane pore forming protein 4851
platelet-derived growth factor receptors 543
receptor tyrosine kinase, role of transmembrane domain 923
Schizosaccharomyces pombe ras1 mediates pheromone-induced transcription 1391
T cell receptor, role of $p59^{fyn}$ tyrosine kinase 4887
Silencing domains
present in thyroid hormone receptor, v-*erbA* oncogene product and retinoic acid receptor 1015
Singlet oxygen
used to probe DNA deformation 2619
Site-specific mutagenesis
of, *Rhodopseudomonas viridis*, photosynthetic reaction centre 777
Skeletal muscle
insulin-stimulated, isolation of a MAP kinase activator 2123
Sodium and lithium tolerance
Schizosaccharomyces pombe, conferred by amplification of sodium ion/proton antiporter 1631
Sodium ion/proton antiporter
amplification confers sodium and lithium tolerance on *Schizosaccharomyces pombe* 1631
Solanum tuberosum
mitochondria, import of *Phaseolus vulgaris* tRNA 1291
tuber development, effect of inhibition of ADP-glucose pyrophosphorylase 1229
Spermatocytes
expression of cyclic AMP response element binding protein 1503
Spermatogenesis
mouse, expression of Sox-5 during 3705
Spinach
sucrose transport, characterization of sucrose carrier cDNA 4705
Spliceosomes
requirements for conformational rearrangement in 5033
role of *Saccharomyces cerevisiae* PRP8 in assembly of 3721
Splicing
role of *Saccharomyces cerevisiae spp91-9* gene 3279
***src* homology domain 2**
of tyrosine kinases, prevents dephosphorylation of epidermal growth factor receptor 559
Src homology domains
role in phosphatidylinositol 3′ kinase binding to macrophage colony stimulating factor receptor 1365
SRF
Xenopus laevis, muscle-specific expression of SRF-related genes in embryos 4981
SRY
human, HMG box recognizes four-way DNA junctions irrespective of sequence 4497
sequence-specific interaction with DNA occurs within minor groove 3039
Starch biosynthesis
Solanum tuberosum, effect of inhibition of ADP-glucose pyrophosphorylase 1229
Starfish oocytes
meiosis reinitiation, relocation of $p34^{cdc2}$ complex with cyclin B 1763
Steroid hormones
3β-hydroxy steroid dehydrogenase/$\Delta^5-\Delta^4$ isomerase, encoded by vaccinia virus SalF7L ORF 1973
temporal co-ordination of gene expression in *Drosophila* metamorphosis by ecdysone 4083
Steroid hormone receptors
co-operation of proto-NLSs in ER and PR 3681
heterodimerization 1409, 1419
transcription activation by 1025
Streptococcus pneumoniae
related penicillin binding protein 1a genes in different penicillin resistant isolates 3831
Streptomyces alboniger
puromycin biosynthesis, gene cluster 785
Stress
tolerance of, role of Hsp104 2357
Stress response
role of glucose regulated protein GRP78 1563
Substrate inhibition
relay of in acetylcholinesterase 3561
Sucrose transport
characterization of spinach sucrose carrier cDNA and functional expression in *Saccharomyces cerevisiae* 4705
Sugar alcohols
role in tolerance of osmotic stress in *Mesembryanthemum crystallinum* 2077
Sulfolobus acidocaldarius
cloning of quinol oxidase 805
Superantigens
mouse mammary tumour virus long terminal repeat encodes transmembrane glycoprotein 1901
Supercoiled DNA
positioning of RNA polymerase during transcription 667
Superinduction
of c-*fos* and c-*jun* by inhibitors of protein synthesis, mechanisms of 2415
Suppressor mutants
DNA sequence recognition, *E.coli* IHF 305
SV40
large T antigen inhibits transactivation by p53 5013
small t antigen, similarity to protein phosphatase 2A PR55 subunit 4601
transcription regulation, role of T antigen and DNA replication 177
SV40 T antigen
replication protein A and DNA polymerase α, protein−protein interaction, role in DNA replication 769
Synapse
amphiphysin, a novel protein associated with synaptic vesicles 2521
Synaptic vesicles
association with amphiphysin 2521
Synaptonemal complex
of meiotic prophase chromosomes, coiled-coil protein specific for 5091

T antigen
polyoma virus and SV40, role in transcription regulation 177
T cell activation
$p21^{ras}$ mediates control of *IL-2* gene promoter function in 4549
T cell lymphoma
chromosome 16 translocation involving IL2 gene 3897
T cell receptor
β chain homodimers on surface of immature T cell lines 2735
β-chain gene rearrangement inhibited by overexpression of $p56^{lck}$ protein tyrosine kinase 4877

ζ chain contains a GTP/GDP binding site 933
ζ chain, regions involved in dimerization 3245
mouse valosin containing protein is tyrosine phosphorylated in response to TCR activation 3533
signal transduction, role of $p59^{fyn}$ tyrosine kinase 4887

T cells
γδ development thymic differentiation β_2- microglobulin deficient mouse 25
effect of disrupted CD2 gene on development and function of 4329
regulation of production of interleukin 2 by endopeptidase 24.11 3875

T7
mutation of RNA polymerase and evidence that DNA and RNA polymerases have similar active sites 3767
RNA polymerase, *in vitro* transcription through nucleosomes 1941

Tachykinin receptors
domains involved in subtype specificity of 3585

TAR
required for pre-mRNA processing 4419

TATA box
role in maize *Adh1* gene expression 157

Tau protein
analysis of domains required for microtubule bundling 3953
is transformed by MAP kinase into Alzheimer-like state 2131
phosphorylation, role in switch to 'Alzheimer state' 1593

TCF-1
sequence-specific interaction with DNA occurs within minor groove 3039

Telomeres
interstitial, are hotspots for illegitimate DNA recombination 725
of human chromosomes, are attached to nuclear matrix 717
shortening of is arrested in immortal cells with telomerase activity 1921

Tetanus toxin
inhibition of neurotransmitter release by tetanus toxin depends on zinc 3577

Tetracycline operator–repressor
regulation of transcription of *Saccharomyces cerevisiae* tRNA genes 1487

β^0-thalassaemia
degradation of β-globin mRNA containing nonsense codon 3271

Thermoplasma acidophilum
subunit structure of proteasome 1607

Thermotoga maritima
Ompα coiled-coil protein spans periplasmic space 4369

Thiamine diphosphate
crystal structure of a thiamine diphosphate-dependent enzyme, *Saccharomyces cerevisiae* transketolase 2373

Thymic differentiation
γδ T cells, development in β_2-microglobulin deficient mouse 25

Thymosin β4
analysis of motifs involved in actin binding 4739

Thyroid epithelium
protein targeting pathways 2337

Thyroid hormone receptor
heterodimerization 1409, 1419
silencing domains 1015

Thyroid hyperplasia
induced by constitutive expression of A_2 adenosine receptor in thyroid 537

Titin
role in vertebrate muscle thick filament assembly 1711

Tn*3* transposase
may be involved in production of 'staggered' head-to-head dimers of *Escherichia coli* plasmid DNA 1965

Tobacco
chloroplasts, translatable *psbL* mRNA formed by RNA editing 1099
mitochondrial RNA processing RNA is associated with higher order structures in the nucleolus 3737

Tobacco rattle virus
tobacco $tRNAs^{Trp}$ suppress UGA termination codon of 4167

TonB
similarity of haemin uptake in *Yersinia enterocolitica* to other TonB-dependent systems 4359

Topoisomerase II
is phosphorylated by casein kinase II *in vivo*, role of in cell cycle 1785
types of cleavage site 705

Torpedo
molecular architecture of collagen-tailed forms of acetylcholinesterase 3255

Touch receptor neurons
expression of *mec-7* β-tubulin in *Caenorhabditis elegans* 2885

Trans-Golgi network
role of G-proteins in vesicular transport 4795

***trans*-sialidase**
identification of gene from *Trypanosoma cruzi* 1705
some members of a *Trypanosoma cruzi* gene family encode proteins with both *trans*-sialidase and neuraminidase 3837

Transactivation
and DNA replication functions of BPV-1 E2 are separate 4111
by p53, is inhibited by HPV-16 E6 oncoprotein and SV40 large T antigen 5013

Transactivator
hepatitis B virus $MHBs^t$, activation of NF-κB 2991

Transcription
activation by mouse *Hox-4.2* 3673
activation by steroid hormone receptors 1025
by RNA polymerase II, synergistic activation by multiple VP16 domains 5005
by *Saccharomyces cerevisiae* RNA polymerase I, novel system for analysis of 4665
by T7 RNA polymerase, through nucleosomes *in vitro* 1941
c-*fos*, effect of phosphorylation of serum response factor 1045
effect on deletion formation in *Escherichia coli* plasmids 3629
HIV-1, TAR-independent activation by Tat 3395
HPV18, role of YY1 in negative regulation of 4607
inhibition of by silencing domains 1015
keratinocyte-specific, of HPV-16 *E6* and *E7*, activation of 2271
laccase, mechanism of suppression in hypovirulent *Cryphonectria parasitica* 4539
of band 3 and carbonic anhydrase II, repressed by v-*erbA* 3355
of c-*fos* proto-oncogene, regulation 3011
of c-*myc*, termination is mediated by holdback of RNA polymerase II at transcriptional start site 3307
of *Fed-1* gene, regulation by light 2311
of glycophorin B, role of GATA-1 in *cis*-regulation 4095
of $H\text{-}2K^b$ major histocompatibility complex class I gene, regulatory region required for 4591
of human c-*myc* in permeabilized nuclei is associated with formation of Z-DNA 4653
of human *cdc2*, repression by retinoblastoma susceptibility gene product 1797
of MHC class II and albumin genes, is regulated by NF-Y 3315
of peripherin gene, *cis* regulation of 2971
of tRNA genes, regulation by tetracycline operator–repressor 1487
of *Saccharomyces cerevisiae* GCN4 and HAP2–HAP3–HAP4, requires GCN5 protein 4145
of *Saccharomyces cerevisiae KAR2*, regulation of 2583
of urokinase-type plasminogen activator, elements required for phorbol ester induction of 4573
p53-mediated repression of, effect of p53–HPV E6 interaction 3045
Plasmodium falciparum, mapping transcription termination and initiation sites using yeast artificial chromosomes 1949
positioning of RNA polymerase 667
regulation, c-*jun*, by retinoic acid and adenovirus E1A 167
regulation, c-*jun* 1479
regulation, *Escherichia coli fis* 1075
regulation, immunoglobulin germline γ1 RNA 145
regulation, mouse albumin and α-fetoprotein 127
regulation, *Petunia* 5-enolpyruvylshikimate-3-phosphate synthase 241
regulation, polyoma virus and SV40 177
regulation by p53, effect of mutations in lung cancer cells 1383
regulation of *Drosophila even-skipped* stripe 2 4047
repression, role of DNA methylation 327
Saccharomyces cerevisiae amino acid biosynthesis, sequence-specific initiator elements focus transcription initiation from the *TRP4* promoter 4583
Schizosaccharomyces pombe pheromone-induced, mediated by *ras1* 1391

temporal co-ordination of gene expression in *Drosophila* metamorphosis by ecdysone 4083
termination, efficiency of c-*myc* attenuator 1085
v-*myb*-induced gene activation is inhibited by chicken B- *myb* 4619
Transcription factors
activation domains involved in proximal and remote activation 4961
Antirrhinum DEF A, flower development 251
AP-1, binding to DNA induced by phorbol esters 2241
AP-1 and C/EBP-like, role in regulation of cMGF 115
AP-2 activates HTLV-I gene expression 2573
Arabidopsis thaliana, heterodimerization 1261
Arabidopsis thaliana GBF1 1275
characterization of rat Brn-4, a novel member of the POU domain family 2551
DNA binding specificity of POU domain 4993
Drosophila dorsal mediates promoter activation and repression 1837
effect of Sp1 and BTEB on transcription of genes with different GC boxes 3663
evolution of nuclear receptor genes 1003
GATA-1, effect on *SCL* gene 4073
GATA-1, role of in erythropoiesis and haematopoiesis 4557
mechanism of formation of ternary complex of SRF, Elk-1 and SAP-1 4619
mechanism of nucleolar targeting of murine UBF 3695
Myf-5, domains required for muscle-specific transactivation 1843
NF-κB, p50 subunit, autoregulation 195
NF-κB p65 subunit and C-Rel, heterodimerization 205
NF-jun, regulation of c-*jun* transcription 1479
NF-Y regulates transcription of MHC class II and albumin genes 3315
nuclear factor I, role in adenovirus DNA replication 751
phosphorylation of UBF by casein kinase II is required for transcription activation 2211
redox activation of Fos and Jun by AP endonuclease 3323
regions of adenovirus E1A required for transactivation of E4 promoter 3347
repression of DRTF1 by retinoblastoma protein is prevented by adenovirus E1a gene 2603
TFIIA and TFIID, analysis of roles in transcription activation by GAL−VP16 2229
Xenopus laevis SRF, muscle-specific expression of SRF- related genes in embryos 4981
Transcription initiation
of histone H5, is repressed by cIBR from erythroid cells 1857
Transcriptional activator
GAL−VP16, mechanism of action 2229
Transcriptional block
S-phase specific release from block in ribonucleotide reductase R2 subunit transcription 4953
Transcriptional terminator
Escherichia coli rho-independent, hypersymmetry confers increased efficiency and bidirectionality 1957
Transferrin receptor
endocytosis, can drive cell locomotion 383
Transformation
CSF and transforming activities of *Xenopus* Mos occur at different times in cell cycle 2447
v-*rel* fusion protein with oestrogen receptor allows regulation of v-*rel* oncoprotein activity by 4641
Transgenic mice
carrying the angiotensinogen gene 821
Transketolase
Saccharomyces cerevisiae, crystal structure of 2373
Translation
initiation factor eIF-4A, regions involved in RNA helicase activity, ATP binding and hydrolysis 2643
of amyloid protein precursor, is regulated by polyadenylation 3099
of picornavirus RNA, usage of dual initiation sites 1105
of RepA leader peptide, is inhibited by plasmid R1 2675
of mRNA containing extensive secondary structure, role of initiation factor eIF-4F 4153
tobacco $tRNAs^{Trp}$ suppress UGA termination codon in tobacco rattle virus 4167
Translational control
Escherichia coli, analysis of the mRNA determinants required for the incorporation of selenocysteine 3759
role of open reading frames of Rous sarcoma virus leader RNA 3747
Translocation
on chromosome 16 in T cell lymphoma 3897
t(15;17), in acute promyelocytic leukaemia, heterogeneous PML/RARα transcripts 1397
Transmembrane domain
of T cell receptor ζ chain, functional analysis 3245
Transposable elements
Ds-like sequence in maize mutant with unstable variegation 4037
Transposase
IS*903*, binding of to its inverted repeat *in vitro* 3449
ISIO, target site recognition, mutational analysis 741
Transposition
Caenorhabditis elegans Tc1, targeted alteration of genome 287
frequent transpositions of *Drosophila melanogaster* Het-A elements to receding chromosome ends, role of in healing broken chromosome ends 4459
of IS*911*, model for 5079
Transvection
is enhanced by alterations in *Drosophila Ultrabithorax* promoter 3645
TRiC
a eukaryotic equivalent of a chaperonin in cytosol 4767
$tRNA^{Gln}$
Escherichia coli, bases required for correct aminoacylation of 4159
***trp* repressor**
preferred target DNA in formation of complex with operator 3021
Trypanosoma brucei
mRNA editing complexes in mitochondria 4429
Trypanosoma cruzi
identification of *trans*-sialidase gene 1705
some members of a gene family encode proteins with both *trans*-sialidase and neuraminidase activity 3837
Tuber development
Solanum tuberosum, effect of inhibition of ADP-glucose pyrophosphorylase 1229
β-tubulin
analysis of introns in *Paramecium* β-tubulin genes 3713
Caenorhabditis elegans mec-7 gene expression in touch receptor neurons 2885
Tumour necrosis factor
cytotoxicity of, heat shock protein hsp70 protects tumour cells from 3507
homology with gp39 4313
Tumour necrosis factor receptor
effect of cytoplasmic truncation, inducible shedding and signalling activity 943
Tumour suppression
role of interaction of p95 with p53 2115
Twintron
new type of in *Euglena gracilis* chloroplast 5041
twist
and *zerknüllt* promoters in *Drosophila*, effect of exchanging *dorsal* binding sites 3147
Twitchin
Caenorhabditis elegans, similarity to titin 1711
Tyrosine kinase
activation of B cells via FcγRIII, role of associated γ chain 2747
neu, 3D structure of transmembrane region 43
role of $p59^{fyn}$ in T cell receptor signal transduction 4887
v-*abl*, can inhibit or stimulate cell growth 3941
Tyrosine kinase receptor
encoded by *Drosophila* D*trk*, role in cell adhesion 391
Tyrosine kinases
src homology domain 2 prevents dephosphorylation of epidermal growth factor receptor 559
Tyrosine phosphorylation
different requirements for platelet-derived growth factor receptor binding to Ras GTPase activator p 1373
of $p56^{lck}$ by $p50^{csk}$ 2919
phosphatidylinositol 3′ kinase effect on binding to macrophage colony stimulating factor receptor 1365
role of in platelet activation 855

U14 RNA
Saccharomyces cerevisiae, deletion analysis and function of mouse−yeast hybrid molecules 683

U3 snoRNA
binding sites in *Saccharomyces cerevisiae* pre-rRNA 1531
U4 snRNA
role in RNA processing 335, 345
U6 snRNA
role in RNA processing 335, 345
UBF
murine, mechanism of nucleolar targeting of 3695
phosphorylation by casein kinase II is required for transcription activation 2211
Ubiquinol
complex with cytochrome *c* reductase, loss of activity in *Saccharomyces cerevisiae BSC1* mutant 3821
Ubiquitin
as a signal for protein degradation 497
Ubiquitin conjugating enzyme
Drosophila and *Saccharomyces cerevisiae*, structural and functional conservation 367
encoded by African swine fever virus 361
Saccharomyces cerevisiae, properties of chimeric CDC34−RAD6 protein 3091
Saccharomyces cerevisiae CDC34 (UBC3), role in cell cycle, deletion analysis 3081
Ubiquitin pathway
of protein degradation, role of proteasome 3077
Upstream regulatory element
analysis of human α globin upstream regulatory element in transgenic mice 4565
Urokinase
binding of transcription factors to gene 205
extracellular proteolytic cleavage by is required for hepatocyte growth factor activation 4825
Urokinase-type plasminogen activator
elements required for phorbol ester induction of transcription 4573

V-*abl*
tyrosine kinase can inhibit or stimulate cell growth 3941
V-*erbA*
represses transcription of band 3 and carbonic anhydrase II 3355
V-*erbA* oncogene product
silencing domains 1015
V-*myb*
chicken B-*myb* inhibits v-*myb*-induced gene activation 4619
V-*rel*
fusion protein with oestrogen receptor allows regulation of v-*rel* oncoprotein activity by hormone 4641
Vaccinia virus
SalF7L ORF encodes 3β-hydroxy steroid dehydrogenase/$\Delta^5-\Delta^4$ isomerase 1973
Vacuolar proteins
sorting of in Golgi, role of clathrin 2811
Valosin containing protein
mouse, is homologue of *Saccharomyces cerevisiae* CDC48 3533
Variegation
analysis of maize *iojap* mutants 4037
Vasodilator-stimulated phosphoprotein
association with actin filaments and focal contacts 2063
Vasopressin
AVP-NP precursor gene, missense mutation in human autosomal dominant neurohypophyseal diabetes insipidus 19
Vesicular stomatitis virus
resistance to, role of MxA protein 1657
Vesicular transport
role of G-proteins in trans-Golgi network 4795
Vinculin
homology to *Listeria monocytogenes* virulence gene *act*A 1981
Virulence
bacteriophage Mu, effect of *Escherichia coli* Clp protease 5121
Virulence factor
viral: vaccinia virus SalF7L ORF encodes steroid hormone 1973
Virulence gene
*Listeria monocytogenes act*A, required for actin assembly in host cells 1981
Virus structure
bacteriophage P2−P4 839
Voltage-dependent anion channel
in guard cell plasma membrane 3569
Volvox carteri
biogenesis of extracellular matrix 2055
VP16
synergistic activation of RNA polymerase II transcription by multiple VP16 domains 5005

X chromosome
rate of evolution of α-repeat DNA 2367
Xenopus
affinity maturation of antibodies in 4337
characterization of MPF-dependent microtubule severing activity 4723
E12 DNA binding protein, role in muscle gene activation 2981
factors affecting stability of Mos during meiotic oocyte maturation 2433
glycolipid involved in cell adhesion during embryogenesis 3845
MAP kinase activator, role of in phosphorylation cascade 973
mesoderm induction by basic fibroblast growth factor, modified by Xwnt-8 33
Mos, CSF and transforming activities occur at different times in cell cycle 2447
p220 microtubule binding activity, effect of phosphorylation 3977
potassium channel, different types of are generated by different levels of a single mRNA 2465
regulation of calcium influx by cAMP dependent protein kinase 891
requirements for polyadenylation of maternal mRNA during oocyte maturation 5021
Xenopus laevis
cyclin A- and cyclin B-dependent protein kinases, differing mechanisms of regulation in egg extracts 1751
identification and early activation of $p70^{s6k}$ following progesterone-induced meiotic maturation 1743
MAP kinase activator, activation of 2903
muscle-specific expression of SRF-related genes in embryos 4981
Na,K-ATPase, mutation confers ouabain resistance 1681
Xiphophorus
Xmrk receptor tyrosine kinase is activated in malignant melanoma 4239
Xwnt-8
modifies *Xenopus* mesoderm induction by basic fibroblast growth factor 33

Yeast artificial chromosomes
complementation of mouse collagen mutation 417
used for mapping transcription termination and initiation sites in *Plasmodium falciparum* 1949
Yersinia enterocolitica
mechanism of haemin uptake 4359

Zea mays
Zmhox1a homeotic gene 3367
zerknüllt
and *twist* promoters in *Drosophila*, effect of exchanging *dorsal* binding sites 3147
Zinc
is required for inhibition of neurotransmitter release by tetanus toxin 3577
Zinc finger proteins
deletion and site-directed mutagenesis of human poly(ADP-ribose) polymerase 3263
with distinct DNA binding specificities, generated by alternative splicing of *tramtrack* 1035
Zinc fingers
determination of base recognition positions of from sequence analysis 4507
